

**Clematis radicans
Trumpet Vine**

All summer, this hardy vine bears large, trumpet-shaped, bright orange flowers attractive to hummingbirds. It is easy to grow in ordinary soil in a sunny spot and is pest-free, growing to **40'** in height. It needs no fastening to cling to any support, making an excellent screen on a fence or wall.

Zones 5 - 9

**Clematis radicans 'Flava'
Yellow Trumpet Vine**

While definitely bright yellow in color, hummingbirds find the clusters of long-blooming, yellow trumpets as irresistible as redder flowers. The rich, green foliage turns golden-yellow in autumn when blooms finally slow down. Ordinary soil, as opposed to richly amended garden soil, is much preferred by Trumpet Vines to provide summer-long blooms. An application of bonemeal to the soil in the spring will encourage Grows **25 - 35'**.

Zones 4 - 9

**Clematis tagliabuana 'Madame Galen'
Trumpet Vine**

One of the choicest summer blooming vines, this is a red form of the classic hummingbird magnet, blooms all summer with all the fine attributes of the traditional radicans. Hummers may decide to set up housekeeping in the thick foliage. It is a vigorous **30'** vine.

Clematis Vines

For sensational big blooms in a range of gorgeous colors, our varieties can be trained on arbors, walls, fences, or use them for screening a spot that's not so pretty, or to cover stumps or climb on poles. Clematis vines grow **6 - 12'** high, and take from 2-3 years to become fully established. Our experience is that vines grown in full sun will produce heavier blooms for a shorter time period than those grown in partial shade where blooms won't be as heavy, but will extend over a longer time. Clematis will benefit from shade over their roots. Don't use heavy bark or leaf mulches in summer as they can promote Clematis wilt. Keep the moisture level of your vines even—never very dry or very wet. Clematis vines can contribute to any landscape with their graceful habits and splendid blooms.

Clematis Bee's Jubilee

Mauve with deep red bar down the center of each sepal.

Flower Size: 6 - 7"

Flowering: May - June & September

Height: 8 - 10'

Zones 3 - 8

Clematis hybrid Carnaby

White with rich red bar down the center of each sepal and dark anthers.

Flower size: 6"

**Flowering Time:
June & September**

Height: 8 - 12ft.

Zones 3 - 8

**Clematis hybrid
Contesse de Bouchard**

Large velvet rose-pink flowers. One of the best pinks.

Flower size: 6 - 7"

**Flowering Time:
June, July & September**

Height: 8 - 12ft.

Clematis montana ‘Ruben’

Pale pink 1" flowers are produced in early summer on red stems and the young leaves are tinged purple. Beautifully covers unsightly structures, carports, or fences over an area as large as 20 – 30'

Plant 5" apart

Zones 4 - 8     

**Clematis paniculata
Sweet Autumn Clematis**

Sweetly scented, creamy white 1" blossoms in great profusion from late summer on (August–September). Vigorous and easy to grow, this old-fashioned vine blooms on new wood, and later forms silvery seed heads.

Plant 5' apart.

Zones 5 - 9     

Climbing Hydrangea

**Hydrangea petiolaris
Climbing Hydrangea**

This is a vigorous vine with smooth foliage and large, white flower clusters in June that can cover a wall, fence, or tree support with roots on its stem much like English Ivy does. The bloom combines large, white flowers seeming to surround small, dull white flower clusters. The effect is lovely especially with the rich green foliage, which has a full habit of growth that complements the blooms.

Plant 5' apart.

Zones 4 - 9     

**Lonicera sempervirens ‘Blanche Sandman’
Coral Honeysuckle**

Reddish-orange, trumpet-shaped flowers opening to yellow first appear in May and continue to bloom off and on until frost on this very vigorous native vine. Use it to climb and screen a porch, trellis, pergola, archway, wall, or fence. This Honeysuckle is aphid-resistant and an incredible hummingbird magnet. **Plant 5' apart.**

Zones 4 - 8      

**Lonicera sempervirens ‘John Clayton’
Yellow Honeysuckle**

Solid yellow tubular flower clusters run on a fence or trellis from May through the summer. This old Virginia native vine is named for the colonial botanist John Clayton, and was found in a churchyard, dating from the 17th century, in Gloucester, Virginia. Semi-evergreen, you will want to prune out flowered wood of ‘John Clayton’ after flowering. **Plant 5' apart.**

Zones 4 - 8      

**Passiflora caerulea ‘Waterloo Blue’
Passion Flower Vine**

This exotic blooming Passion Flower Vine handles a minimum temperature of 45 degrees and thrives as a container plant in the full sun it loves best. Breathtakingly beautiful with its sky-blue corolla against fringed-white petals, it blooms profusely, has a soft fragrance, and sports shiny, green, attractive foliage. Glossy green leaves with turning tendrils need support to climb. **Plant 5' apart.**

Zones 6 - 10     

**Polygonum aubertii
Silver Lace Vine**

One of the fastest growing vines there is, expect 12'–15' of growth the first year. Use it to cover arbors, fences, old buildings, or a barn in no time. It produces masses of tiny fragrant white flowers from July through September. This vine will do well in sun or shade.

Plant 5' apart.

Zones 5 - 7
