**Acanthus mollis**  
**Bear’s Breeches**  
White and mauve-pink flower spikes resemble Fuchsia blooms rising to 4’ in August above the large shiny incised green leaves. This classic specimen plant wants plenty of space and a break from full sun. It is somewhat evergreen and drought resistant, but requires a protected spot in the garden to survive the mid-Atlantic winters.  
Plant 36” apart.

**Acanthus spinosus**  
**Spiny Bear’s Breeches**  
Two-toned white flowers with purplish bracts bloom on feathery spikes above dark glossy green mounded foliage from late spring to mid summer. This 3-4’ tall bear’s breeches offers unique architectural form which more than makes up for the spiny-tipped leaves and spiny flower bracts that are a little tricky to handle. Prefers some shade.  
Plant 24” apart.

**Acanthus x ‘Whitewater’**  
**Variegated Bear’s Breeches**  
A remarkable combination of texture and contrast are exhibited in this new variety. Deeply cut dark green leaves have a splash of white on the leaf edges. Cylindrical spikes stand 4” tall with tubular flowers that are pink and creamy white. ‘Whitewater’ has proven to be quite vigorous and tolerant of heat and humidity. Use in containers or as an annual in colder climates.  
Plant 24” apart.

**Achillea millefolium**  
**‘Paprika’**  
Yarrow  
Flat top inflorescences have ruby red and yellow flowers on 18-24” stalks. Blooms appear in early to mid summer and will re-bloom after cutting back old flower stems. Lovely cut fresh or used in dried arrangements. Heat, drought and humidity tolerant ‘Paprika’ is mat-forming, with deeply cut medium green foliage.  
Plant 18” apart.

**Achillea millefolium**  
**‘Peachy Seduction’**  
Yarrow  
Plant 18” apart.

**Achillea millefolium**  
**‘Pink Grapefruit’**  
Yarrow  
Plant 18” apart.

**Achillea millefolium**  
**‘Pomegranate’**  
Yarrow  
A standout in the cottage or cut flower garden, red-purple flower clusters bloom in mid June to July. The vigorous bright green ferny foliage is compact and non-melting in hot, dry summers. Upright, sturdy plants grow to 24-30” tall. Use with Monarda, Veronica and Aster for a long season of color.  
Plant 18” apart.

**Achillea millefolium**  
**‘Terra Cotta’**  
Yarrow  
Beautiful contrasts in color when blooms change from salmon peach to terra cotta and then fade to pale yellow. Gray-green foliage grows to 24-30”. Combine with Acesila tuberosa and Verbena bonariensis in the butterfly garden.  
Plant 18” apart.

**Achillea millefolium**  
**‘Coronation Gold’**  
Yarrow  
Golden-yellow blossoms sit atop 23” stems from June to August. Gray-green foliage has a strong and upright growth habit. Benefits from an occasional shear to promote repeat blooms all summer.  
Plant 18” apart.

**Achillea millefolium**  
**‘Gertel’s Rose’**  
Yarrow  
Bright rose-pink flowers grace the short sturdy 12” stems of this yarrow from May into July. Cutting for drying or arrangements will encourage re-blooming. Deep green ferny foliage fills in quickly. Blooms fade gracefully to white. Try with Coreopsis ‘Zagreb’, Amsionia ‘Blue Ice’ and Agastache ‘Black Adder’.  
Plant 18” apart.

**Achillea millefolium**  
**‘Little Moonshine’**  
Dwarf Yarrow  
This dwarf version of ‘Moonshine’ has the same long lasting lemon-yellow flowers that appear in flat clusters on compact 9-12” stems above silvery-gray foliage. The small package makes it perfect for rock gardens, border edges and containers. Remove spent blooms for continuous flowers from early summer to frost.  
Plant 12” apart.
**Achillea x ‘Moonsine’**  
**Shade**  
Plant 18” apart.”

**Actaea racemosa**  
**Snakeroot**  
Here’s a graceful native perennial that bears long, white bottlebrush-like wands of flower plumes on upright stems. The large, ferny green leaves stand about 30” high, and the flowers 2’–3’ above long branching stems. Blooming in July, it brightens a woodland garden, or is equally happy in the back of a sunny border where the hot afternoon sun is equally happy in the back of a sunny border.  
Plant 18” apart.”

**Agapanthus ‘Blue Yonder’**  
**Lily-of-the-Valley**  
Unique flower clusters of intense cobalt-blue bloom all summer long and are self-cleaning. Clusters appear on 30” tall stems above clumps of strappy medium green foliage. Agapanthus makes a great addition to the mixed border for our zone 7 customers or use in containers for zone 5 (6). Move containers to a cool, dry indoor location during the winter.  
Plant 24” apart.”

**Ajuga reptans**  
**‘Black Scallop’**  
**Bugle Weed**  
This ajuga has very dark purple, glossy, scalloped shaped leaves that grows 4”–6” tall. It has a mound habit and achieves its darkest leaf color in full sun. It displays deep blue flower spikes from late spring to early summer. PP18515.  
Plant 12” apart.”

**Aegopodium podagraria**  
**‘Variegatum’**  
**Snow on the Mountain or Bishop’s Weed**  
A prime addition to the dry shade groundcover list, ‘Variegatum’ aegopodium spreads rapidly through the summer under high limbed trees, in the rock garden, and in a range of difficult areas.  
Plant 18” apart.”

**Ajuga reptans**  
**‘Bronze Beauty’**  
**Bugle Weed**  
The bronze-purple leaves of this freely spreading ground cover are covered in vibrant, long lasting flowers. A striking edging opción is this leggy flower spikes in May and June. Low growing at a maximum height of 6”.  
**Cut Flower**  
Plant 6” apart.”

**Aconitum carmichaelii**  
**‘Arendsii’**  
**Monkshood or Turk’s Cap**  
Spectacular dark blue hooded flowers on 3’ spikes characterize this unique perennial. Also makes gorgeous glossy lobed green leaves and provides fall color in part shade gardens. It is happiest in cool, well-drained areas with rich soil in light shade.  
Because its lovely flowers persist well into fall, try with Anemones and Wood Asters for a bright look.  
Plant 18” apart.”

**Agastache x ‘Black Adder’**  
**Hyssop**  
Dark purple buds open to bottlebrush-like violet flowers in June and, with an occasional trim, will continue to bloom until frost. This veritable butterfly magnet has anise scented bushy foliage which does not appeal to deer! Grows to 2’–3’ tall. Plant in average to dry soil and avoid wet feet in winter. Perfect with Achillea and Summer Phlox.  
Plant 24” apart.”

**Agastache x ‘Blue Fortune’**  
**Mexican Hyssop**  
Try this new bloomer for its deep blue flower spikes at 2’–3’ that are so long lasting and attractive to butterflies and hummingbirds from July to September.  
The fragrant green foliage is compact yet bushy preferring well-drained soil on the average to dry side. Create a blue garden with Salvia ‘Blue Hill’, Nepeta ‘Blue Wonder’ and Aster ‘Wood’s Blue’.  
Plant 18” apart.”

**Agastache foeniculum**  
**‘Golden Jubilee’**  
**Golden oats Alice Hyssop**  
Golden foliage is complimented by lavender-blue flowers that are bottlebrush-like and long blooming from mid-summer to fall. Grows to a height of 20”. Performs best in well-drained soil. Try with Miscanthus ‘Little Zebra’, Echinacea ‘PowWow Wild Berry’ and Geranium ‘Rozanne’.  
Plant 18” apart.”

**Agastache x Kudos™**  
**‘Yellow’**  
**Dwarf Hummingbird Mint**  
After the hummingbirds leave Kudos™ ‘Coral’ they will gladly fly over to this equally enticing yellow version. The Kudos™ Series are noted for their large, dense flower spikes, hardness and mildew resistance. Fragrant gray-green foliage grows 2’ tall in well-drained soil and full sun. PP925663.  
Plant 24” apart.”

**Agastache x Kudos™**  
**‘Coral’**  
**Dwarf Hummingbird Mint**  
Expect a charm of hummingbirds to visit the non-stop fragrant coral-pink tubular flowers from early summer through September. Lovely upright fragrant gray-green foliage grows 18” tall. Drought tolerant once established. Provide excellent drainage. Perfect with Artemisia ‘Powis Castle’ and Achillea. PP25613.  
Plant 18” apart.”

**Agastache x ‘Kudos™’**  
**‘Blue’**  
**Dwarf Hummingbird Mint**  
With its deep blue flower spikes it draws attention of butterflies and hummingbirds from July to September.  
The fragrant green foliage is compact yet bushy preferring well-drained soil on the average to dry side. Create a blue garden with Salvia ‘Blue Hill’, Nepeta ‘Blue Wonder’ and Aster ‘Wood’s Blue’.  
Plant 18” apart.”

**Agastache x ‘Kudos™’**  
**‘Yellow’**  
**Dwarf Hummingbird Mint**  
After the hummingbirds leave Kudos™ ‘Coral’ they will gladly fly over to this equally enticing yellow version. The Kudos™ Series are noted for their large, dense flower spikes, hardness and mildew resistance. Fragrant gray-green foliage grows 2’ tall in well-drained soil and full sun. PP925663.  
Plant 24” apart.”

**Agastache x Poquito™**  
**‘Lavender’**  
**Dwarf Hummingbird Mint**  
Polka dot-like flowers attract lavender-pink bottlebrush spikes are incredibly long blooming from early summer into fall.  
14” x 15” compact fragrant foliage with endless flower power is perfect for container gardens, butterfly garden, patio or rock garden. Try with Coreopsis ‘Citron’ and Santolina incana nana. PPAF 15” apart.”

**Ajuga reptans**  
**‘Dark Blue’**  
**Bugle Weed**  
Large spikes of violet-blue tubular flowers consume the bushy foliage from early summer into fall.  
14” x 14” fragrant compact foliage with endless flower power is perfect for container gardens, butterfly garden, patio or rock garden.  
Plant 15” apart.”

**Agastache x ‘Poquito™’**

**Perennials**

**Gold = Sun, Green = Shade + level deer resistance**
(see page 2 for program details)

---

**Ajuga Reptans**

**‘Burgundy Glow’**

Bugle weed

A dramatic show of color in mid to late spring occurs when the 8” lilac flower spikes rise above the colorful foliage of rose-burgundy, creamy white and green varigation. Rapidly spreading and tolerant of foot traffic, ‘Burgundy Glow’ is useful in a shady rock garden, as an edging or as a ground cover. Plant 6” apart.

---

**Ajuga x ‘Chocolate Chip’**

Dwarf Bugle Weed

Narrow miniature leaves are a rich dark chocolate color forming tidy rosettes that hug the ground at 2”. Lacy blue flowers at 2” bloom in May and June. This Ajuga is a delightful true natural dwarf alternative to the traditional groundcover for sun or shade. The shade garden use with Hucheria ‘Carmel’, Hosta ‘August Moon’ and Tassel Fern. Plant 12” apart.

---

**Alchemilla mollis**

Lady’s Mantle

An easy to grow ground cover with fan-shaped leaves that will collect rain or dew like sparkling jewels. **Yellow-green star-shaped flowers appear in July and August on 18” arching stems.** Prefers moist soil and partial shade. A very tough plant that is underused in the garden. Try it in combination with Geranium ‘Roazanne’ and Brunnera.

---

**Allium ‘Globeaster’**

Ornamental Onion

Truly eye-catching objects in a spring border, the huge spheres of ‘Globeaster’ are formed by clusters of star-shaped lavender-purple flowers. Each globe is 8” in diameter and sits atop a 30-32” upright stem. Strappy basal foliage is replaced by the tall flowering stems in mid-spring. Plant amongst perennials such as Geraniums, Iris or Peonies. Plant in well-drained soil. Plant 12-18” apart.

---

**Anemone sylvestris**

Snowdrop Anemone

This spring blooming anemone has upward-facing cupped white flowers on stems that stand above green, deeply lobed foliage. After blooming, flowers leave behind interesting white, woody seed heads. Spreads by rhizomes making it valuable as a ground cover in part shade. Height is 12-15”. Use with Helboreus, Meehania cordata and Dicentra. Plant 12” apart.

---

**Anemone Fantasy™**

**‘Pocahontas’**

Hybrid Anemone

This windflower will make a nice addition to a new world garden with its compact stature, profuse blooms and late summer appeal. Double powder-pink blooms appear on sturdy stems starting in August and continuing into October. Slug-resistant dark green foliage fills out quickly in moist, well-drained soil. The 12-18” height calls for it to be placed near the front of the border. PP25352 Plant 18” apart.

---

**Anemone Fantasy™**

**‘Red Riding Hood’**

Hybrid Anemone

Perfect at border’s edge as a late summer splash of color with a crazy number of single deep reddish-pink flowers above dense, compact dark green foliage. Eye-catching blooms stand at only 12-18”. Combine with Wood Aster for a fabulous late summer to early fall duet. PP25312 Plant 18” apart.

---

**Anemone Fantasy™**

**‘Prairie White’**

Hybrid Anemone

A dramatic show of pure white flowers with pink-tinted veins on stems that stand above green, deeply lobed foliage. This anemone has a compact stature and is of interest in both bloom and foliage, especially when paired with Perennial Oregano. ‘Prairie White’ blooms in late summer to October. Plant 18” apart.

---

**Amsonia x hybridra**

**‘Lorelei’ (‘Loreley’)**

Hybrid Anemone

Reddish buds on 36-40” tall stems open to pale pink semi-double flowers in late summer. Blooms continue into fall, offering late season color and beautiful cut flowers. A perfect companion to the deep violet-blue flowers of Anemone ‘Arendsii’. Plant 24” apart.

---

**Anemone ‘Wild Swan™’**

Hybrid Anemone

From Scottish nurserywoman Elizabeth MacGregor, this rare find in the U.S. market will illicit many oohs and aahs from onlookers. Long blooming white and lilac blue flowers float on 18” tall wiry stems from mid-summer through fall. Large flowers have white petals with a blue band on the reverse side and, as the flowers close in the evening, the nodding blooms display the blue more prominently. PP23132 Plant 18” apart.

---

**Anemone x hybridra**

**‘Pamina’**

Widow’s Lace

This medium height Anemone blooms heavily in late summer to fall with pretty double pink cup-shaped flowers on dark stems 2’ above the compact green foliage. Use with Lobelia siphilitica and Calamagrostis bradychrya. Plant 18” apart.

---

**Anemone x hybridra**

**‘Pocahontas’**

Hybrid Anemone

A dramatic show of color in mid to late spring occurs when the 8” lilac flower spikes rise above the colorful foliage of rose-burgundy, creamy white and green varigation. Rapidly spreading and tolerant of foot traffic, ‘Burgundy Glow’ is useful in a shady rock garden, as an edging or as a ground cover. Plant 6” apart.

---

**Anemone hupenhensis**

**‘September Charm’**

Windflower

Pink single flowers are freely and continuously produced on 2-3” stems from August to October. An old favorite for many gardens. For a lovely late summer display plant with Aconitum ‘Kneiff’s Blue’ and Physostegia ‘Miss Manners’. Plant 18” apart.

---

**Anemone ‘Wild Swan™’**

Hybrid Anemone

From Scottish nurserywoman Elizabeth MacGregor, this rare find in the U.S. market will illicit many oohs and aahs from onlookers. Long blooming white and lilac blue flowers float on 18” tall wiry stems from mid-summer through fall. Large flowers have white petals with a blue band on the reverse side and, as the flowers close in the evening, the nodding blooms display the blue more prominently. PP23132 Plant 18” apart.
Aquilegia bertoloni 'Biedermeier'
Columbine
A lovely array of mixed pastel blues, cream, light pink and purple. Characterized this medium height (10-15") Columbine. A very neat plant with a compact growth habit, its May to July dancing blooms make excellent cut flowers if cut when 50% open. Lovely with ferns and Phlox 'Blue Moon'. Plant 18" apart.

Aquilegia canadensis 'Corbett'
Wild Columbine
A delightful pale yellow form of our native columbine discovered locally and introduced by nurseryman Richard Simon. Compact at 12-15" 'Corbett' produces early blooms on a single plant in early to mid spring. The soft yellow lanterns combine well with Amsinckia 'Blue Ice', Iris cristata, or Phlox stolonifera 'Blue Ridge'. Prefers moist rich soil and will self-sow in optimal conditions. Plant 15" apart.

Aquilegia flabellata var. pumila 'Little Lanterns'
Dwarf Columbine
The lowest growing Columbine yet, this 8" dwarf sports blue flowers with compact, low, green-gray foliage through May and June. A good choice for the front of the border or equally well suited for the rock garden. Combine with Tiarella 'Brandywine' and Dicentra 'Luxuriant'. Plant 18" apart.

Arabis caucasia 'Snowflox'
Rock Cress
A dependable choice for less than desirable soils, this ground cover works well in rock gardens or crevices in rock walls. Arabis forms a 6" tall evergreen mound and is an early spring bloomer with white flowers and gray green foliage. Plant with Phlox subulata, Heuchera and Dianthus. Plant 12" apart.

Arabis caerulea 'Songbird Mix'
Columbine
Bi-colored flowers of rose, blue, pink or yellow combined with white will provide a colorful array of extra-large columbine flowers when planted in groups. This classic mix blooms from May-June and prefers well-drained soil and afternoon shade. Plant 18" apart.

Artemisia schmidtiana 'Nana'
Silver Mound
Silver Mound is fine in the full-sun border or rock garden where the soft sheen of its foliage makes a striking contrast to flowers and other foliage in a wide range of hues. Easy to grow, Silver Mound prospers in dry heat and average soil. Plant in well-drained soil. PPAF

Asarum canadense
Wild Ginger
Our native ginger has kidney-shaped leaves on 4-6" tall stems that form a colony in the woodland or moist shade garden. Unless you are camping out and place your sleeping bag next to a colony of wild ginger, you will probably not notice the ground-hugging blooming "brown jugs" underneath the foliage. A must for the woodland garden with Tiarella, Native Ferns and creeping Phlox. Plant 12" apart.

Armeria maritima 'Splendens'
Thrift
Outstanding for its continuous show of vibrant, rose-pink, rounded 1" flower heads on 6-8" stems from May to July. Dwarf and mound forming, its grassy foliage provides the gardener an excellent edging for chairs, for use in beds, borders or for the rock garden. Plant 12" apart.

Armeria pseudoarmeria 'Balliera Red'
False Sea Thrift
Spheres of rose-red flower clusters on upright stems resemble Candy Land-like clusters amongst grassy foliage. Like A. maritima blooming begins in mid to late spring and continues sporadically throughout the summer. The evergreen leaves however are broader, the flower clusters are larger and height is taller in bloom at 12-14". Tolerates dry soils and salt spray. Plant 12" apart.

Artemisia arborescens 'Pows Castle'
Woodworm
As drought tolerant as can be, the feathery gray-green foliage of 'Pows Castle' is more compact than Silver Mound at 2-3", and can even be clipped to form a low hedge. 'Folsom' is a garden of poor, sandy soil, the aromatic foliage only demands well-drained soil. Multi-talented Woodworm is gorgeous in the white garden, as foliage in a cut or dried arrangement, and shines next to dark-leaved perennials in the border or rock garden. Plant 18" apart.

Aruncus dioicus
Goat's Beard
The imposing size of this native, reaching up to 5' tall and forming clumps as wide as 6', makes Goat's Beard an excellent backdrop for the partly shady border or woodland garden. Actively color changes in late spring and early summer contribute softness to the structure. Aruncus prefers moist fertile soil. Plant 36" apart.

Asclepias incarnata
Swamp Milkweed
Both a nectar source and host plant for the Monarch Butterfly, Swamp milkweed has a narrow upright form with white leaves and flat top clusters of rose-pink blossoms growing 3'-4' tall and blooming July through September. Easily grown in medium wet to wet soils. Plant in a butterfly garden of meadow with Liatris, Monarda and summer Phlox. Plant 24" apart.

Asarum canadense
Wild Ginger
Our native ginger has kidney-shaped leaves on 4-6" tall stems that form a colony in the woodland or moist shade garden. Unless you are camping out and place your sleeping bag next to a colony of wild ginger, you will probably not notice the ground-hugging blooming "brown jugs" underneath the foliage. A must for the woodland garden with Tiarella, Native Ferns and creeping Phlox. Plant 12" apart.
Asclepias tuberosa  
*Butterfly Weed*  
Perennial Plant of the Year 2017  
A true friend of pollinators! Brilliant orange flowers bloom in late spring and continue for several weeks. If flower stems are cut before they go to seed a second round of blooms will be had at the enjoyment of bees and butterflies. Foliage grows 1-2’ and tends to emerge late in the spring. Prefers average dry to medium wet, well-drained soils. Plant 18” apart.

Aster divaricatus  
*White Wood Aster*  
Our native Wood Aster has shiny white daisy flowers August-October that when utilized in partial shade are stunning peaking out between Asters, Hostas, and Bergenia, where its 1-2’ twiggly stems are hidden. Likewise, our mid-Atlantic forests surely benefit from its upright presence with its large basal leaves, whether among deciduous ferns or native Solidago. Plant in average to dry conditions. Plant 18” apart.

Aster oblongifolius  
*October Skies*  
*Perennials*  
Aromatic Aster  
A widely popular aster in the mid-Atlantic and rightly so. Co. bushy foliage is attractive all summer and is covered with lavender-blue flowers in fall that keep the butterflies hanging around. Use in native plant gardens, mixed borders, containers or in mass plantings. 18” tall and wide foliage is tolerant of poor, dry soils. Note: the leaves are fragrant when crushed. Plant 18” apart.

Aster tataricus  
*Jindai*  
Tatarian Aster  
This tall late-flowering Aster was found in Jindai Park in Tokyo, and is the prized shorter version of the species at 4-5’. Blooming from late September through October, there isn’t a sturdier-stemmed and more vigorous Aster around. The clusters of lavender blue daisy flowers have a yellow center on those sturdily stems, and stand well above the large leaves that remind one of chard. The foliage stays attractive all summer and fall. Plant 18” apart.

Aster novae-angliae  
*Purpurea 'Dame'  
*New England Aster*  
This dwarf native New England Aster blooms through September with an intensity that’s hard to believe. The 1” purple flowers are so dense they cover the foliage, creating a dome of bright purple 18” high. Plants show almost no mildew. Try ‘Purpurea’ with Sedum ‘Autumn Joy’. Plant 18” apart.

Aster laevis  
*Bluebird*  
Smooth Aster  
Light blue daisy-like flowers appear in clusters on arcing stems with season-long clean foliage in late summer to fall. This 3-4’ tall native cultivar is an important component of a meadow planting along with Andropogon, Schizachyrium, Helianthus and Monarda. Foliage can also be trimmed in early summer to create a more dense habit for the formal garden setting. Plant 24” apart.

Aster novi-belgii  
*Blue Bayou*  
Showmakers®  
*New York Aster*  
The dwarf mounded foliage of this adorable New York Aster is covered with large double violet blue flowers in late summer to fall. Use in contain- ers or place at the front of the border for eye-catching late summer color. A couple of light trims early in the season will encourage maximum bloom poten- tial. Grows 10-12” tall. Plant 18” apart.

Aster novi-belgii  
*Vision in Pink*  
False Spirea  
This member of the ‘Vision’ family has similarities in form with light pink blooms in July. The leaves are deeply incised, coarsely textured and bright green. Grows 18-20”. Give it a try in your garden with Brunnera, Lamium, or Japanese Painted Fern. PP118850  
Plant 18” apart.

Aster chinesis  
*Vision in Red*  
False Spirea  
This addition to the ‘Vision’ group has pink-red flowers opening from deep rose to lighter bronze green foliage. Grow in partial shade organically rich moist soil. Will grow to 18”, blooming mid summer. Combine with Aquilegia, ferns and Helonias ‘Anna’s Red’. Plant 18” apart.
Astilbe chinensis
"Vision in White"
False Spirea
This compact addition to the Vision series has strong stems that are well branched and grow to 18". It has long lasting, clear white feathery plumes which bloom July to August. The dark green leaves show hints of bronze. Give it a try with other Astilbes, Brunnera, and Lamium. PP#18965.
Plant 18" apart.

Astilbe japonica
"Deutschland"
False Spirea
Very compact and vigorous, this lovely white Astilbe is tough, pest-free, and handsome. It leaves the flower spikes on after they’ve finished blooming, because they are especially attractive with snow on the ground. You will find all varieties good for cutting if picked half-open. Blooms in June and July. 20–24" tall. Plant 18" apart.

Astilbe japonica
"Peach Blossom"
False Spirea
When the buds open to airy plumes of soft salmon pink and a sweet aroma fills the air, you will be happy you chose ‘Peach Blossom’ to grace your shady border. Attractive dark green foliage all season with 20–24" tall blooming spikes in June and July. Excellent choice as a cut flower for its fragrance and beauty. Plant 18" apart.

Astilbe japonica
"Rheinland"
False Spirea
A clear, bright pink at 24", its glossy green foliage complements the flowers very nicely. Like our red variety ('Fanari'), ‘Rheinland’ will require more watering and mulching in hot, dry weather to stay gloriously beautiful while blooming during June and July. Use Astilbes in groups of 3 or 5 in the border or mass them in shady locations. Plant 18" apart.

Astilbe japonica
"Sprite"
False Spirea
Perennial Plant of the Year 1994
A choice dwarf shell pink Astilbe variety, so charming and vigorous at 18". Its abundant pale pink flowers appear in July atop delicate, ferny, dark bronze foliage. A graceful, airy choice for the garden, it is excellent in a container as well. Plant 18" apart.

Astilbe taquetii
"Purple Candles"
False Spirea
This rugged and beautiful Astilbe is our tallest variety at 40" or so, blooming in mid-to-late summer when the rest tolerance becomes an added asset. The dense lavender-purple spikes may look best toward the back of the partly shaded border rising above the bronze-green foliage. By mixing different varieties, Astilbes can effectively brighten the shade garden for three months. Plant 18" apart.

Astilbe "Delft Lace"
False Spirea
This beautiful Astilbe with shiny blue-green foliage will be a great addition to your shade garden. Will tolerate more sun with foliage becoming deep maroon. Burgundy stems produce salmon pink buds that open to a softer pink flower in midsummer. This hybrid has a strong upright flower spike growing 24-36" tall. PP#19893
Plant 22" apart.

Baptisia x "Deutschland"
False Indigo
Perennial Plant of the Year 2010
This durable, long-lived native perennial produces weather-resistant, soft gray green foliage 3-4" high, topped in June by Intense blue flowers that last for weeks, followed by prominent dark seedpods, which all told, make an attractive presence throughout the summer. Great on its own against a stone wall, fence, or back of the border. Plant 18" apart.

Baptisia x "Peach Smoke"
False Indigo
A chance union of Baptisia australis and Baptisia alba produced this vigorous baptisia. With charcoal stems, lemony green foliage, topping out around 4' and dusty violet flowers that resemble lupines, you will grow to love this perennial. Once established, it thrives in lean well-drained soil and will be quite drought tolerant.
Plant 24" apart.

Baptisia "Rheinland"
False Indigo
In mid to late spring Baptisia draws the eye with its tall spikes of blue pea-like flowers above bushy blue-green foliage. This complex hybrid will combine more attention with lemon yellow flowers that age to orange-red, a spectacular sight as both colors are present on a single stem. Overall height is 3-4'. Bred by Dr. Jim Ault of the Chicago Botanic Garden. PP#20408 Plant 48" apart.

Baptisia "Twilight"
Prairieblues™
False Indigo
A vigorous heat-tolerant hybrid of two native prairie species that produces many flower spikes on a single plant. The bi-colored flowers are deep violet-purple to almost copper and have a touch of lemon yellow. This Baptisia won't sing the blues when planted as a single specimen for its attractive 4-5" tall blue-green foliage. PP#2011 Plant 36" apart.
Begonia grandis
Hardy Begonia
As functional as the Hardy Begonia has proven in shady landscape spots, we think the white-flowering version is important to offer as well. Grows 15 – 18". As long blooming and bright as the white version is, its leaves seem to combine with a host of other foliage textures and shapes from Astilbes and Hostas to Polygonatum and Convallarias.
Plant 18" apart.

Begonia grandis 'Alba'
Hardy Begonia
The Perennial Farm is ‘The Delivery Specialist’ with deliveries to most locations 2-3 times per week.

Brunnera macrophylla
Dwarf Anchusa
This fine perennial Forget-Me-Not produces tiny clusters of small pale blue flowers from April to June. It has handsome, round, textured leaves that hold up well in the garden well into the fall. It does well in semi-shade or full sun. Its 18" height makes it ideal for a woodland setting, for the front of the border, or as a ground cover. Try it with Heuchera Plum Pudding, Alchemilla mollis, and a yellow Hosta such as ‘August Moon’.
Plant 18” apart.

Bergenia cordifolia
Heartleaf
Distinctive glossy, heart-shaped leathery leaves are evergreen, turning warm, reddy shades in the fall. Bright pink flower clusters bloom in April/May about 12” from the base and flower for weeks. Prefers rich, humusy soil that retains moisture and would rather be spared the mid-day sun. Our hummingbird summers sometimes makes Bergenia appeal to slugs, so some control may be warranted. Try with Dicentra.
Plant 18” apart.

Brunnera macrophylla
'Alexander's Great'
Siberian Bugloss
Side by side with its cousin ‘Jack Frost’, ‘Alexander’ boasts much larger heart-shaped leaves that are covered in metallic silver with intricate dark green veins and a thin green margin. Clumps grow 15-18” tall and 30” wide, accompanied by delicate (yes delicate) sky blue flowers in early spring. PP#25789
Plant 30” apart.

Brunnera macrophylla
'Sea Heart'
False Forget-me-not
Noteworthy for its exceptional tolerance of heat and humidity, ‘Sea Heart’ also blooms a couple of weeks earlier in spring than ‘Jack Frost’ and has two-toned pink and blue flowers. The 6-12” tall foliage has thick leaves that are heart-shaped and green with an intricately patterned silver overlay. PP#24684
Plant 12” apart.

Brunnera macrophylla
'Silver Heart'
False Forget-me-not
This new variety has thick silver heart-shaped leaves with a narrow green leaf margin and delicate green venation. Compared with other variegated varieties, it is more tolerant of heat and humidity. Very pretty blue forget-me-not flowers top the 6-12” tall foliage in spring. PP#24685
Plant 18” apart.

Calaminth nepeta
‘White Cloud’
Calaminth nepeta
Literally clouds of tiny white flowers keep this tough perennial working well through heat, sun, and humidity. Calaminth has small minty fragrant leaves, blooms from June through September on upright stems to 18”. Give it the well-drained soil it prefers. Use it in the rock garden or border where you need white to separate bright colors or blend with pastels. Plant 18” apart.

Ceratostigma plumbaginoides
Leadwort
A colorful and easy-to-grow perennial, Plumbago reaches just 12" in height and forms a green ground cover, with clusters of gorgeous peacock blue flowers from August into October. The foliage turns deep mahogany in fall and the brilliant flowers keep opening, which makes an eye-catching show. Excellent as a ground cover over bulbs as it breaks dormancy for weeks. Prefers rich, humusy soil.
Plant 12” apart.

Chelone glabra
White Turtlehead
The 1-2’ white snapdragon-like flowers of the White Turtlehead open, just a few at a time, in late summer and autumn, and are composed of two lips like a turtle’s head. A hardy native, it prefers moist soil, is 2-3’ in height with glossy foliage, and attracts butterflies. Try it in a moist meadow setting or woodland. Widely grown as a cut flower in Europe. Plant 18” apart.

Campanula poscharskyana
‘Blue Waterfall’
Sebastian Bellflower
Captivating dark blue, bell-shaped flowers with a white center, appear mostly in June-July over green cascading foliage, perfect for dry walls, rock gardens, containers, the edges of a path, or in the front of the border. Grows 8-10” tall. Plant 18” apart.

Campanula x ‘Beyond Blue’
Bellflower
Outstanding lavender-blue flowers bloom profusely on upright foliage in late spring. Grows 14-18” tall in full sun. Try it with Danthium ‘Firewitch’ and Stachys ‘Helene von Stein’ near the front of the border. Plant 12” apart.

Centaura montana
Cornflower
Also called the Bachelor Button, it has large, showy violet-blue flowers with red centers and very fringed petal edges. About 18-24” in height, the Cornflower blooms in June and July, and may re-bloom in fall if cut back after its first bloom period. Keep this perennial on the dry side in full sun.
Try it with white Summer Phlox. Plant 18” apart.

Centaurea x ‘Birch Hybrid’ Bellflower
A profuse blooming groundcover, nodding lavender-blue flowers begin to appear in late spring and, with regular deadheading, will continue to bloom into late summer. Foliage is bright green and 4-6” tall with serrated leaves. Combine with Coreopsis, Danthium and Thymus.
Plant 18” apart.

Campanula x
‘Firewitch’ and Stachys ‘Helene von Stein’ near the front of the border. Plant 12” apart.

Calaminth nepeta
‘Blue Cloud’
Calaminth nepeta
You will think you have died and gone to heaven when surrounded by the ‘clouds’ of tiny pale blue flowers and aromatic silvery foliage. Growing to 12-15”, Calaminth makes a great filler plant under taller or leggy perennials. Use with Echium, Helopsis, Iris, or Liatris.
Plant 12” apart.

Calaminth nepeta
‘White Cloud’
Calaminth nepeta
Digitally clouds of tiny white flowers keep this tough perennial working well through heat, sun, and humidity. Calaminth has small minty fragrant leaves, blooms from June through September on upright stems to 18”. Give it the well-drained soil it prefers. Use it in the rock garden or border where you need white to separate bright colors or blend with pastels. Plant 18” apart.

Use it in the rock garden or border where you need white to separate bright colors or blend with pastels. Plant 18” apart.

Campanula x
‘Beyond Blue’ Bellflower
Outstanding lavender-blue flowers bloom profusely on upright foliage in late spring. Grows 14-18” tall in full sun. Try it with Danthium ‘Firewitch’ and Stachys ‘Helene von Stein’ near the front of the border. Plant 12” apart.

Centaura montana
Cornflower
Also called the Bachelor Button, it has large, showy violet-blue flowers with red centers and very fringed petal edges. About 18-24” in height, the Cornflower blooms in June and July, and may re-bloom in fall if cut back after its first bloom period. Keep this perennial on the dry side in full sun.
Try it with white Summer Phlox. Plant 18” apart.

Campanula x
‘Beyond Blue’ Bellflower
Outstanding lavender-blue flowers bloom profusely on upright foliage in late spring. Grows 14-18” tall in full sun. Try it with Danthium ‘Firewitch’ and Stachys ‘Helene von Stein’ near the front of the border. Plant 12” apart.

‘Beyond Blue’ Bellflower
Outstanding lavender-blue flowers bloom profusely on upright foliage in late spring. Grows 14-18” tall in full sun. Try it with Danthium ‘Firewitch’ and Stachys ‘Helene von Stein’ near the front of the border. Plant 12” apart.
Chelone lyonii ‘Hot Lips’
Pink Turtleshead
A hardy native plant that inhabits boggy areas or the banks of streams, they prefer some shade and deep, moist soil, thus making great woodland plantings. The Pink Turtleshead has rosy-pink snapdragon-like flowers in August and September. 2–3” tall foliage with glossy leaves forms a sizable clump. Plant 18” apart.

Chelone obliqua
‘Tiny Tortoiseback’
Turtleshead
Perfect for a combination planter with its compact glossy dark green foliage and unique hot pink flowers. Or plant in its native habitat, along a stream or pond edge and allow to spread over time. Moisture loving foliage grows 18-24” tall and will be more robust in full sun. PPAF
Plant 15” apart.

Coreopsis grandiflora
‘Solana’™ Golden Sphere™
Tickseed
Make no mistake, these puffy golden yellow pom-poms belong to a perennial Coreopsis! Medium green compact foliage is topped with the fully double blooms from early to late summer. Routine dead-heading will prolong the beauty. Grows 10-12” in full sun. PP25241
Plant 12” apart.

Coreopsis palustris
‘Summer Sunshine’
Swamp Tickseed
Tickseed! This grower’s favorite, bright yellow flowers with dark brown cones begin to appear on upright and vigorous 4’ tall plants well into fall to the delight of many pollinators. Native to swampy areas of the Southeastern U.S., it prefers most soil and tolerates extended periods of wet conditions. Disease resistant.
Plant 36” apart.

Coreopsis verticillata
‘Moonbeam’
Tickseed
Perennial Plant of the Year 1993
This native perennial is one of the very best selections. Lemon yellow single flowers are profusely produced throughout the summer (June to frost) above lovely foliage that is duff, dew, and insect resistant. A compact grower 15-18” high, it blends well with a multitude of colors and seems to fit anywhere.
Plant 18” apart.

Coreopsis x ‘Citrine’
Hardy Jewel™ Series Tickseed
‘Citrine’ is a unique Coreopsis with low growing, spreading thread-leaf foliage that is only 5-10” tall. Bright yellow flowers bloom continuously, starting in early summer and continuing into early fall. Self-cleaning, it requires little maintenance as blooms appear above old ones that disappear. While a trim is not required, it may be preferred to promote a tidier habit. PP922478
Plant 12” apart.

Coreopsis x ‘Daybreak’
‘Big Bang’™ Tickseed
A compact variety from Darrell Probst of Big Bang™ fame, it has the same excellent disease resistance and sterile flowers that translate to non-stop blooms all summer. Golden yellow flowers bloom continuously. Mid-size orange-red center blooms begin blooming in early summer and continue to fall. 8-12” tall foliage should be trimmed mid-season for maximum flowering. PP27318
Plant 15” apart.

Coreopsis x ‘Cosmic Eye’
Big Bang™ Tickseed
Watch for an explosion of color when the 2” yellow flowers open, exposing a deep burgundy-red banding around a golden center. Blossoms will keep bursting from early summer into fall on 12–15” tall medium green foliage. The foliage of this Tickseed has a finer texture than C. grandiflora but not as delicate as C. auricula. PP921609
Plant 18” apart.

Coreopsis verticillata
‘Zagreb’
Tickseed
This bushy 18” native Coreopsis is covered from July to September with masses of starry single flowers in a bright golden yellow with delicate fern-like foliage. Ideal for limited-space gardens, ‘Zagreb’ is handsome even when not in bloom, and handles average to dry conditions.
Plant 18” apart.

Coreopsis x Solanna™ ‘Golden Sphere’
Tickseed
Perennial Plant of the Year 1993
‘Moonbeam’ is topped with the fully double blooms from early to late summer. Routine dead-heading will prolong the beauty. Grows 10-12” in full sun. PP25241
Plant 12” apart.

Coreopsis rosea
‘American Dream’
Tickseed
A rare pink accented by a golden-yellow center, this native Coreopsis prefers moist soil, making it well suited to waterside plantings and moist locations most other Coreopsis don’t like. It does have the same enthusiasm for blooming as its yellow cousins, doing so above fine, needlelike foliage of rich green to a height of 12–18” in June and July.
Plant 18” apart.

Coreopsis verticillata
‘Zagreb’
Tickseed
This bushy 18” native Coreopsis is covered from July to September with masses of starry single flowers in a bright gold yellow with delicate fern-like foliage. Ideal for limited-space gardens, ‘Zagreb’ is handsome even when not in bloom, and handles average to dry conditions.
Plant 18” apart.

Convallaria majalis
Lily-of-the-Valley
The old-fashioned garden favorite is a fantastic shady ground cover looking spectacular in a mass with its fragrant white bells in April and May. At about 8” in height, plants are easy to grow and will last a lifetime. A layer of organic compost applied in December or January will in-sure a healthy, prolific performance next spring. Try it with Lady Fern, Dicentra eximia, and Pulmonaria.
Plant 12” apart.
Coreopsis x 'Mercury Rising'
Big Bang™ Tickseed
Deep burgundy red velvety petals surround a yellow center on blooms that begin in early summer and continue to fall. Cold hardiness and the red flower color are due to the C. rosea parentage. In cool temperatures, flowers may be streaked with creamy white for added appeal. Grows to 15–18” and will spread up to 3’. PP24689
Plant 24” apart.

Coreopsis x 'Polaris'
Tickseed
New from the Big Bang™ series, a beautiful Coreopsis that is hardy to zone 5! Flowers with ivory petals surrounding a yellow center mingle well with all colors in the garden. Compact and vase-shaped, the 24” tall thread leaf foliage covers all of blooms all summer to frost. Plant in drifts to soften or separate colors. PPAF
Plant 18” apart.

Coreopsis x 'Red Elf'
Ly' Bang™ Tickseed
Get a big bang of bold red from this little titler! Deep velvety red flowers with yellow centers top upright stems at just 6-12” above the compact mounding foliage. ‘Red Elf’ blooms continuously through summer, calling for an occasional trim to keep foliage fresh and to remove spent blooms. PP27918
Plant 15” apart.

Coreopsis x 'Starlight'
Ly' Bang™ Tickseed
A beauty from early summer to fall, the large blooms in the beginning and middle of the season are white with a bright red starburst eye and as temperatures cool, the flowers become streaked with burgundy red. A couple of trims will keep plants tidy and long-blooming. 12” tall foliage is quite disease resistant. PPR8005
Plant 15” apart.

Coreopsis x ‘Tequila Sunrise’
Tickseed
You’ll think the vibrant foliage of this Coreopsis would be startling enough, but add the delightful bright yellow single flowers with a reddish-brown eye that appear in May and June, and you have a unique new hybrid for the garden. The leaves in spring have a pinkish-red tint as well as cream and yellow. 15” tall. You have to see this bright beauty to believe it. PPR8875
Plant 18” apart.

Coreopsis x Uptick™ 'Gold & Bronze'
Tickseed
A show-stopper for sure, this new variety has very large golden-yellow flowers with a prominent bronze-red eye. Compact 14-16” tall foliage is topped with the eye-catching blooms from late spring to summer. Summer’s height and dense heading encourages a better bloom performance and helps keep plants tidy.
Plant 18” apart.

Cornus canadensis
Bunchberry
An herbaceous member of the Dogwood family, bunchberry is found throughout the northern half of North America in mountainous forests where soils are cool, moist and acidic. One to two layers of oval pointed leaves grow in whorls along the 4-6” stems. In the late spring, Dogwood blossoms appear with four white bracts that surround clusters of tiny greenish-white flowers. Bright red berries in late summer add interest and attract a variety of wildlife. Plant 18” apart.

Corydalis flexuosa Hillier’s 'Porcelain Blue'
Corydalis
Vibrant blue flowers appear in mid to late spring on clumping bluish-green foliage that grows 10-12” tall. This Corydalis does not go dormant in summer and may re-bloom in late summer to fall. Prefers rich, humus rich soil in morning sun with afternoon shade.
PPAF
Plant 18” apart.

Crocosmia x 'Emily McKenzie'
Montbretia
Here’s a spectacular cut flower and great border plant with long arching spikes of trumpet-shaped orange flowers with a bronzey-red center, rising from attractive sword-shaped leaves. The vibrant orange flowers have wider overlapping petals than ‘Lucifer’. At 24-30” in height, and with a July-August bloom time, it doubles as a flower and foliage plant.
Plant 12” apart.

Crocosmia x 'Lucifer'
Montbretia
Here’s the famous flowers of Crocosmia are truly eye-catching in the middle of the border in July and August. At 3’, the long lasting flowers are complemented by sword-like foliage that does best in a sunny well-drained fertile soil. Provide this bulbous perennial with mulch in the winter while it strengthens its roots. Try it in the garden with Achillea ‘Moonshine’, Coreopsis ‘Moonbeam’ and white Liriope. Plant 12” apart.

Delosperma ‘Beaufort West’
Ice Plant
Light pink daisy-like flowers adorn this 1-2” succulent ground cover from spring to early summer and again in the fall. A selection from the alpine environment of South Africa, ‘Beaufort West’ tolerates dry conditions and well-drained soil. Somewhat slow to spread, the fleshy green foliage will spill out of containers and drape over rocks. Plant 12” apart.

Delosperma cooperi Trailing Hardy Ice Plant
Rosy-pink daisies are produced from June through September above a dense mat of succulent foliage that hugs the ground no more than 3” high. Easy to grow and drought-tolerant, it is lovely cascading over a wall, edging the front of the border, as a ground cover, or as a container plant. Plant 18” apart.

Delosperma dyeri
Ice Plant
Bring vibrant color to the walkway or rock garden with this fast spreading succulent ground cover. Head spinning multi-colored flowers have bright orange petals that are purplish-pink toward the center and surround a white eye. The 2” tall light green succulent foliage is covered with blooms in late spring to early summer. A 2012 Plant Select Winner. Plant 18” apart.

Delosperma 'Fire Spinner'
Ice Plant
New for 2019
This Ice Plant has creeping, dark green, succulent foliage reaching 3” in height and spreads approximately 15”. It flowers late spring to fall in shades of salmon, coral and orange. It is a sun loving groundcover that will tolerate poor soil, but must have excellent drainage. Try it in your rock garden, container or between stepping stones. Plant 15” apart.

Delosperma congestum 'Gold Nugget'
Ice Plant
This South African alpine succulent has butty yellow flowers in summer that turn up to the bright yellow 3” tall tight mounds. ‘Gold Nugget’ appreciates some afternoon shade in hot summers and requires a little more moisture than other Delospermas. Foliage transforms to reddish-maroon in winter.
Plant 12” apart.

Dorisporum 'Norwich'
Montbretia
Canary yellow trumpet-shaped blooms shine above the classic sword-like foliage in July and August making ‘Norwich’ a bright color alternative to other Crocosmias. Shorter at 20” than our other choices, hummingbirds don’t discover it, and appreciate all three cultivars.
Plant 12” apart.

Montbretia
Crocus x
'Norwich' Montbretia
Canary yellow trumpet-shaped blooms shine above the classic sword-like foliage in July and August making ‘Norwich’ a bright color alternative to other Crocosmias. Shorter at 20” than our other choices, hummingbirds don’t discover it, and appreciate all three cultivars.
Plant 12” apart.

Plant 18” apart.

Coreopsis 'وجهين المزsand' (السعودية) (السعودية) (السعودية) (السعودية) (السعودية)
**Delosperma 'John Proffitt'**

TABLE MOUNTAIN® Ice Plant

Add this succulent ground cover that keeps on blooming from spring until fall. Deep *Delosperma* flowers open in the heat of the day for a burst of color and close again in the late afternoon. Bright green foliage reaches a 2" height and creeps into cracks, hangs over walls, and spills out of containers. How is it that “Ice” plant is so hot and drought tolerant?

Plant 18" apart.

**Delphinium 'Dark Blue/Dark Bee'**

Dwarf Delphinium

Delphinium is the cottage and cut flower garden must have. For smaller spaces use this dwarf variety (30-30") for its intense dark blue flowers with darker violet-blue centers (bees). Cut back after the first flowering to encourage re-blooming and allow some flowers to seed for the next year.

Plant 24" apart.

**Delphinium x 'Kahori'**

Garden Pinks

Expect an incredible number of blooms throughout the summer on compact 4-6" tall plants with foliage that continues to look fresh and untroubled. Grassy green foliage is covered with clove-scented dark pink flowers from late spring to late summer. An occasional light shearing keeps plants looking tidy and promotes flowering. Great for vivid color in small containers, on the edge of the border or in the rock garden. PPAF

Plant 12" apart.

**Delphinium hybridum 'Pacific Giants Mix'**

The regality of these stately flowers is truly evident when the 4-6" tall spikes in blue, rose pink, lavender and fuchsia fringed flowers jump out against the blue-gray foliage of Delphinium. Plant most prolifically in June, and then on and off through the rest of the summer. Give good drainage and a spot at the front of the border, this Canadian Ornamental Plant Foundation introduction will perform well for us right here in the mid-Atlantic. Propagation prohibited.

Plant 18" apart.

**Dianthus x 'Neon Star'**

Garden Pinks

Sweetly fragrant, the florescent pink flowering flowers jump out against the blue-gray foliage. ‘Neon Star’ thrives best with full sun and well-drained moderately dry soil. Compact at 6-8", it will bloom spring through fall. Combines well with *Phlomis* 'Seminentual Blue' and *Festuca 'Elijah Blue*'.

Plant 18" apart.

**Dianthus spectabilis 'Old Fashioned Bleeding Heart'**

A garden favorite for years, it’s fairly tall at 3’, and has evenly spaced pink hearts suspended gracefully on its long stems. It prefers no direct sun and blooms happily in April and May. Remember that it may go dormant in mid-summer. Try under planting with ferns, Mertensia, or ground covering shade lovers such as *Tarela* ‘Running Tupae’ or *Creeping Phlox*.

Plant 18" apart.

**Dianthus x Mountain Frost® 'Pink PomPom'**

Compact mound and foliage has petite fragrant double rose-pink flowers from spring to fall. Pinching spent flowers will keep plants tidy and encourage more blooms. Grows 6" tall in full sun and is tolerant of a little extra moisture. Try with *Coreopsis 'Citron'*,'Salvia 'Blue Marvel' and *Verbena 'Whitewast*'.

Plant 18" apart.

**Dianthus x 'Firewitch'**

Cutleaf Bleeding Heart

Myriad of heart-shaped rose-pink flowers stand 2-4’ above grayish-green fern-like foliage, starting in May and continuing through fall. Effective by itself or in mixed plantings, this woodland native reaches 12-18” in height and does well in shade or sun. In the shady garden try it with *Astillbe*, *Pulmonaria*, blue or green leaved Hostas, and ferns.

Plant 18" apart.

**Dianthus x Mountain Frost® 'Dancing Dianthus'**

Compact, mounding habit of pink flowers that bloom from spring to fall. Masses are exquisitely delicate and white color gives the plant a different aura. You won’t tire of this spring sight in your shady garden, especially if used in a mass. Height is 8". Try with Hosta ‘Fire and Ice’, *Japanese Beech Fern* and *Hosta ‘Silver Star’*.

Plant 18" apart.

**Dianthus x Mountain Frost® 'Old Fashioned Bleeding Heart'**

Golden yellow foliage forms a bright contrasting backdrop for the dangling rose-pink heart-shaped flowers that bloom in mid to late spring. Forms a bushy plant rounding to 36” tall. Prefers average to moist, well-drained soil.

Plant 18" apart.
**Digitalis purpurea** 'Candy Mountain'  
**Foxglove**

The stunning rose-pink early summer blooms are bell shaped with upward-facing flared throats that are visible all around the stems. ‘Candy Mountain’ is a very sturdy and erect variety that grows to 3'-4' tall. What a classic and wonderful addition to the cottage garden!  
Plant 18” apart.

**Digitalis x mertonensis**  
**Foxglove**

Foxgloves do best in part shade with moist soil and plenty of organic matter. This perennial variety is 3’ tall, has deep pink bell-shaped flowers with contrasting crimson spots on sturdy spikes that rise above lovely green foliage. Blooms June and July, it will provide sensational cut flowers if picked when half open. These are the hardy varieties for this area.  
Plant 18” apart.

---

**Echinacea purpurea** 'Kim’s Knee High'  
**Dwarf Purple Coneflower**

As tough and durable as Echinacea is, we’re delighted to offer this 18”-20” compact version of the classic American native. Same July-September bloom time, butterfly magnetism, and drought-tolerance, the rosy-pink flowers later present a multitude of seeds to entice finches to feast as autumn arrives.  
Plant 18” apart.

---

**Digitalis purpurea** 'Candy Mountain White'  
**Foxglove**

Common foxglove, native to the British Isles and found frequently in the English cottage garden, is a treasure in gardens on this side of the pond as well. The tubular white flowers of this foxglove have purple speckled throats and face upward. Blooms on 24-28” tall strong stems. Prefers rich, consistently moist soil. Plant 18” apart.

---

**Echinacea purpurea** 'Prairie Splendor'  
**Coneflower**

For the meadow or naturalized area what better coneflower than ‘Prairie Splendor’? Its compact, well branched habit, at 24” tall and a little closer to the edge of the garden where the rose-pink petals and the butterflies that visit them can be appreciated.  
Starts blooming a little earlier than other varieties too!  
Plant 18” apart.

---

**Echinacea purpurea** 'Green Jewel'  
**Coneflower**

Blooms with light green horizontal rays and dark green cones are a calming alternative to the bold reds, yellows and oranges of other new cultivars. Sturdy, well-branched foliage grows 20-24” tall. This selection will provide use in cut flower arrangements and mixed borders for its ability to break up colors or blend into a softer landscape. PP218678  
Plant 18” apart.

---

**Echinacea purpurea** 'White Swan'  
**White Coneflower**

The white native Coneflower grows from 2-3’ tall with the same large flowers as the purple form. They both thrive in hot, dry conditions and are happy in ordinary garden soil. Attractive to butterflies. Plants are nearly white and white Coneflowers together in big clumps for a dazzling summer display.  
Plant 18” apart.

---

**Echinacea x purpurea** 'ButterflyTM 'Cleopatra'  
**Coneflower**

From breeder Arie Blom of the Netherlands, pretty ‘Cleopatra’ has large sunny yellow flowers with rusty-orange cones that sit atop 15-18” tall stems from June to August. Plants are sun-tolerant with sturdy stems and attractive medium green foliage. PP214631  
Plant 18” apart.

---

**Echinacea purpurea** 'Pica Bella'  
**Purple Coneflower**

The blooms of vibrant ‘Pica Bella’ will be a focal point in the perennial border with deep purple-pink petals that surround an intense bronze-orange cone. The petals emerge pinched at the tips and are held horizontally around the cone. The blooms are the delight of butterflies from June to early September. Upright, sturdy stems grow 24-36” tall.  
Plant 18” apart.

---

**Echinacea purpurea** 'PowWow Wild Berry'  
**Coneflower**

Not just another purple coneflower! Exceptional blooming habit with many flowers produced on the compact, 20-24”, well-branched plants from late spring to late summer. The 3-4” diameter flowers have deep rose-purple ray petals surrounding a rose-tinted dark orange cone and retain color longer than its cousin. Sturdy stems will not require staking.  
Plant 18” apart.

---

**Echinacea purpurea** 'Coneflower'  
**From breeder Arie Blom of the Netherlands, pretty ‘Cleopatra’ has large sunny yellow flowers with rusty-orange cones that sit atop 15-18” tall stems from June to August. Plants are sun-tolerant with sturdy stems and attractive medium green foliage. PP214631  
Plant 18” apart.

---

**Echinacea purpurea** 'Prairie Splendor'  
**Coneflower**

For the meadow or naturalized area what better coneflower than ‘Prairie Splendor’? Its compact, well branched habit, at 24” tall and a little closer to the edge of the garden where the rose-pink petals and the butterflies that visit them can be appreciated.  
Starts blooming a little earlier than other varieties too!  
Plant 18” apart.

**Echinacea purpurea** 'White Swan'  
**White Coneflower**

The white native Coneflower grows from 2-3’ tall with the same large flowers as the purple form. They both thrive in hot, dry conditions and are happy in ordinary garden soil. Attractive to butterflies. Plants are nearly white and white Coneflowers together in big clumps for a dazzling summer display.  
Plant 18” apart.
Echinacea x purpurea ‘Butterfly™’ ‘Orange Skipper’ Coneflower

Tangerine-orange single flowers draw the attention of not just the orange skipper! We have already seen the popularity of this new addition to our coneflower collection. Compact and sturdy at 15-18” tall, use in containers or in the mixed border. PPAF Plant 18” apart.

Echinacea x purpurea ‘Cheyenne Spirit’ Coneflower

Bloom color reminiscent of a Cheyenne woman’s beaded buckskin dress are magneta, orange, red, purple, white and yellow (some with fluted rays). A multiple award-winner, the habit is solidly upright at 24-30” tall, well branched and very floriferous. Plant in groups for a full range of colors that will provide beautiful cut flowers. Plant 18” apart.

Echinacea x purpurea ‘Harvest Moon’ Big Sky™ Series Coneflower

Another wonderful echinacea from Matthew Saul, ‘Harvest Moon’ has golden yellow petals surrounding a cone of golden orange. The fragrant blooms begin in June and continue to frost. Grow 24-30” tall. Tr. with Iris Caesar’s Brother, Russian Sage and Liatris. PPAF27652 Plant 18” apart.

Echinacea x purpurea ‘Hot Papaya’ Cone-fections™ Series Coneflower

Each bloom emerges with papaya colored ray petals and a deep orange-yellow cone. The mature flower has rich orange-red ray petals that are topped by a double, reddish-orange pompon. The pompon has remarkable papaya colored halo in the center that grows as it ages. It has sturdy stems growing 30-36” tall. PP22022 Plant 18” apart.

Echinacea x purpurea ‘Milkshake’ Cone-fections™ TM Series Coneflower

A single layer of drooping creamy-white petals surround double vanilla-white flowers that will eventually cover the entire surface of the cone. Sturdy stems reach 30-36” in height. Amazing long lasting blooms will hold their color in the garden for many weeks or as cut flowers. PP220594 Plant 18” apart.

Echinacea x purpurea ‘Raspberry Truffle’ Cone-fections™ Series Coneflower

This unusual variety has coral-pink ray petals that transform to salmon-pink and surround a darker pink pompon. A chocolate center develops in the pompon and becomes larger as the flower matures. The eye-catching flowers sit atop strong dark brown stems that reach 22-32”. A nice upright, well branched selection. PP #22612 Plant 18” apart.

Epimedium grandiflorum ‘Lilafee’ Barrenwort

Little Fairy Wings is a treasure to behold in spring when the adorable long-spurred lavender-violet flowers flutter about the 10-15” tall foliage. Spiny-toothed oval leaves emerge with a red tinge in spring and mature to green in the summer. The drought tolerant and semi-evergreen foliage ages to be deep red in fall. Plant 12” apart.

Epimedium x perralchium ‘Frohleiten’ Barrenwort

New heart-shaped leaves in spring have bronze-red mottling over green and turn to dark green in summer. Clusters of bright yellow flowers in mid spring sit just above the foliage on very thin upright stems. This 8-12” tall spreading ground cover is semi-evergreen and prefers a little more moisture than other species. Plant 18” apart.

Epimedium rubrum Barrenwort

A ground cover unlike any other, with heart-shaped leaves that are tinged red-brown on the edges, Barrenwort performs as its name implies. It is the best ground cover for dry shade needing a good loamy soil. The semi-evergreen foliage is 9” tall and develops a mounding habit of red starry flowers with white spurs in May close to the leaves. Try it with Pulmonaria, Carex, and blue-leaved Hostas such as ‘Blue Cadet’. Plant 12” apart.

Epimedium x ‘Tomato Soup’ Coneflower

Unique and true red blossoms measure 5” across and have a deep orange-coral brown cone with petals that eventually fade to pinkish-red. This coneflower has flowering stems that stand tall at 3’ and it looks best planted in groups of 3 or more. Imagine the butterfly activity and eyes crossing when combined with Agastache ‘Blue Fortune’ and Solidago ‘Fireworks’. PP25447 Plant 18” apart.
Perennials

**Epimedium**

*Epimedium x versicolor* **‘Sulphureum’**

**Barrenwort**

‘Sulphureum’ has the same great performance in dryish shade as E. rubrum and sports masses of small yellow star-shaped flowers in April. At 12” in height, the heart-shaped leaves on wiry stems are bronze when young, then mature to green. Mass in the foreground of a shady bed or use as edging. Cut old foliage to the ground in spring so that flowers will be visible. Plant 12” apart.

**Epimedium x warleyense** **‘Orange Queen’**

**Barrenwort**

Dainty orange-copper flowers appear in mid to late spring just above the 8-10” tall foliage. The new heart-shaped leaves and spring are pale green with a red tinge, transforming to solid green in summer and bronze-red in fall. Perfect for the shady bed or use as edging. Old and under evergreen shrubs and trees. Slow to spread but well worth the wait! Plant 12” apart.

**Eryngium**

*Eryngium planum* **‘Blue Hobbit’**

**Sea Holly**

Adorable yet prickly thistle-like flowers in summer and deep toothed foliage provide amazing texture in stunning shades of blue. Although quite small at 8-12” tall, it still provides the same contrasting texture and intense color as its larger cousins making it perfect for a rockery or container. Prefers well-drained or dry sandy soil. Drought tolerant and tolerant of salt spray. Plant 12” apart.

**Epimedium**

*Epimedium x youngianum* **‘Nivenum’**

**Barrenwort / Bishop’s Hat**

Dedicate as can be, short-stemmed white flowers dangle above medium green foliage a little later in spring than other Epimedium. New heart-shaped leaves have a reddish hue and soon mature to green, forming a 6”-8” tall clump. A three-season-interest ground cover for shade with deep red fall foliage. Plant 12” apart.

**Eupatorium**

*Eupatorium maculatum* **‘Gates’**

**Joe Pye Weed**

This native has large stately, graceful flower heads of dusky rose-pink on strong red stems that open during August and provide a late summer and fall complement to autumn colors. Its flower heads will be a magnet to butterflies. Handsome medium green leaves with a compact growth habit. Prefers some shade in hot afternoon sun. Plant 24” apart.

**Gaillardia**

*Gaillardia x grandiflora* **‘Arizona Sun’**

**Blanket Flower**

Arizona Sun is an outstanding new variety, which will produce a profusion of large fiery red and yellow flowers June through August. Its compact moundling habit makes it a wonderful choice for a sunny border planting, growing to 24”. Attracts butterflies. Plant 15” apart.

**Gaillardia x grandiflora** **‘Sunset Cutie’**

**REALCOLOR COMPACT Series Blanket Flower**

Sun-loving blanket flower offers vibrant color all summer and this compact variety is no exception. Blooms with two layers of deep red petals and fringed creamy yellow bracts. Tips are exceptionally long-lasting. This prolific bloomer only needs an occasional deadheading to keep it looking great all summer. Plant 12” apart.

**Euphorbia**

*Euphorbia agymaloidea* var. robbiae

**Robb’s or Wood Spurge**

Dainty as a groundcover for its speedy growth, clean attractive rich green foliage for dry shade, or sunny conditions. Its greenish-yellow flower bracts are borne on stems in May and June above the dark green rosettes of leaves. It is quite disease and insect free, drier proof, and reliably tough. Plant 18” apart.

**Euphorbia**

*Euphorbia x martini* **‘Acot Rainbow’**

**Spurge**

A pot of gold at the end of the rainbow! Variegated leaves of light green with golden yellow margins show hints of pinkish-red in cooler temperatures. Clusters of light green, cream and red flowers in spring appear above the 20” foliage. PP#12401

**Fragaria**

*Fragaria x‘Lipstick’**

**Flowering Strawberry**

Deep pink 1” flowers cover the handsome, deep green foliage of ‘Lipstick’ from May into October. They are sensational in hanging baskets, window boxes, or as edging for a walk or border line. Runners produce a graceful, trailing effect on the 6” plant which is easy to grow, vigorous, hardy, semi-evergreen, and has edible though bland-flavored berries. Plant 24” apart.

**Euphorbia**

*Euphorbia characias* **‘Glacier Blue’**

**Mediterranean Spurge**

Cool blue-gray leaves with broad creamy edges are held horizontally on upright sturdy stems and are topped with creamy white and green bract-like flowers in spring. The 12-24” tall foliage with provide architectural interest in mixed containers. Prefers well-drained soil. Try with Hakea ‘All Gold’ and purple or black Heuchera. PP#20607

**Filipendula**

*Filipendula rubra ‘Venusta’**

**Queen of the Prairie**

This native selection forms large clumps of deeply divided foliage that grows 3-7’. In the summer, tall stems of dusky pink flowers rise above the bright green leaves. Prefers moist soil and is great for naturalized areas, wet meadows or moist areas along streams or ponds. Plant 24” apart.

**Gaillardia**

*Gaillardia x grandiflora* **‘New York Red’**

**REALCOLOR Series Blanket Flower**

An exciting new introduction, this blanket flower offers one of the most dramatic displays of color of all red gaillardias. Its spraying of red firework heads is followed by dark bronze-red bracts. Plant 24” apart.

**Galtonia**

*Galtonia candida* **‘Vaseline’**

**Zephyranthes**

This species is in the same family as lilies but produces an evergreen, beige-striped form with creamy white bell-shaped flowers in early spring. Prefers well-drained, acid soil and sun. Plant 12” apart.

**Gaura**

*Gaura lindheimeri* **‘Albert White’**

**Butterfly Bush**

This variety is a long blooming selection with white fragrant flowers against yellow foliage. Prefers full sun and well-drained soil. Plant 18” apart.

**Galtonia**

*Galtonia candida* **‘White Carpet’**

**Zephyranthes**

A fragrant, clean fragrance and a long blooming selection from late spring through July. Blooms are fragrant and pure white with spikes of small, bell-shaped flowers. Prefers full sun and well-drained soil. Plant 12” apart.
