Perennials

Epimedium x versicolor ‘Sulphureum’

Barrenwort ‘Sulphureum’ has the same great performance in dryish shade as E. rubrum and sports masses of small yellow star-shaped flowers in April. At 12” in height, the heart-shaped leaves on wiry stems are bronze when young, then mature to green. Mass in the foreground of a shady bed or use as edging. Cut old foliage to the ground in spring so that flowers will be visible.

Plant 13” apart.

Zones 5 - 8

Epimedium x youngianum ‘Niveum’

Barrenwort / Bishop’s Hat

Dedicate as can be, short-spurred white flowers dangle above medium green foliage a little later in spring than other Epimedium. New heart-shaped leaves have a reddish hue and soon mature to green, forming a 6-8” tall clump. A three-season-interest ground cover for shade with deep red fall foliage.

Plant 12” apart.

Zones 4 - 8

Eryngium planum ‘Blue Hobbit’

Sea Holly

Adorable yet prickly thistle-like flowers in summer and deep toothed foliage provide amazing texture in stunning shades of blue. Although quite small at 8-12” tall, it still provides the same contrasting texture and intense color as its larger cousins making it perfect for a rockery or container. Prefers well-drained soil and tolerates poor soils.

Plant 12” apart.

Zones 5 - 7

Eupatorium coelestinum

‘Hardy Agatorum’ Variegated Sea Holly

Use in moist meadows or for erosion control where this freely spreading native will attract pollinators and provide nectar for butterflies and native bees. In late summer soft-textured pale blue flower clusters appear on 3’ tall foliage and continue into September and October. Blooming meadow partners include Lobelia, Rudbeckia and Solidago.

Plant 24” apart.

Zones 5 - 7

Gaillardia x grandiflora ‘Little Joe’

Blanket Flower

This dwarfy dwarf Joe Pye Weeds (3-4”) has a host of attributes besides attracting butterflies, birds, and bees. Thriving in moist, sandy soil with some acidity, its pale pink flowers appear in clusters on red stems in September. Content to softly complement many other late summer fall bloomers, try it with Asters, Rudbeckia of all sorts, and Solidago. Who says fall gardens are boring? PP#196322 Plant 18” apart.

Zones 5 - 9

Eupatorium maculatum ‘Gateway’

Joe Pye Weed

This native has large stately, graceful flower heads of dusky rose-pinks on strong red stems that open during August and provide a late summer and fall complement to autumn colors. Its flower heads will be a magnet to butterflies. Handsome medium green leaves with a compact growth habit. Prefers some shade in hot afternoon sun.

Plant 24” apart.

Zones 5 - 9

Epimedium x warleyense ‘Orange Queen’

Barrenwort

Dainty orange-copper flowers appear in mid to late spring just above the 8-10” tall foliage. The new heart-shaped leaves in spring are pale green with a red tinge, transforming to solid green in summer and bronze-red in fall. Perfect for the rock garden or under evergreen shrubs and trees. Slow to spread but well worth the wait.

Plant 12” apart.

Zones 5 - 8

Epimedium warleyense var. robbiae

Robbi’s or Wood Spurge

Useful as a groundcover for its speedy growth, clean attractive rich green foliage and for dry shade, or sunny conditions. Its greenish-yellow flower bracts are borne on stems in May and June above the dark green rosettes of leaves. It is quite disease and insect free, cleaner proof, and reliably tough.

Plant 18” apart.

Zones 7 - 9

Euphorbia amydaloidea

Mediterranean Spurge

Cool blue-gray leaves with broad creamy edges are held horizontally on upright sturdy stems and are topped with creamy white and greenish bracts in spring. The 12-24” tall foliage provides architectural interest in mixed containers. Prefers well-drained soil. Try with Hakea and ‘All Gold’ and purple or black Heuchera.

Plant 18” apart.

Zones 5 - 7

Fragaria x ‘Lipstick’

Flowering Strawberry

Deep pink 1” flowers cover the handsome, deep green foliage of ‘Lipstick’ from May into October. They are sensational in hanging baskets, window boxes, or as edging for a walk or border bed. Runners produce a graceful, trailing effect on the 6’ plant which is easy to grow, vigorous, hardy, semi-evergreen, and has edible though semi-rippled, bright red berries.

Plant 24” apart.

Zones 3 - 9

Gaillardia x grandiflora

‘Sunset Cutie’ REALSIL® COMPACT Series

Blanket Flower

Arizona Sun is an outstanding new variety, which will produce a profusion of large fiery red and yellow flowers June through August. Its compact mound habit makes it a wonderful choice for a sunny border planting, growing to 12”. Attracts butterflies.

Plant 15” apart.

Zones 6 - 9

Gold = Sun, Green = Shade + level deer resistance

(see page 7 for program details)
Gaillardia x grandiflora 'Mesa'™ 'Peach' Blanket Flower
Warm peachy-orange flowers with yellow-tipped petals appear in early summer and the remarkable non-fading flowers continue to bloom until frost. Foliage is dense and non-floppy with a height of 16-18". A long blooming season and extreme drought tolerance make this a winner in the full sun rock garden. Plant 18" apart.

- Zones 6 - 9
- Cultivar

Gaillardia x grandiflora 'Mesa'™ 'Red' Blanket Flower
Deep red blooms from early summer to fall on well-branched foliage with a non-floppy habit. Long lasting color-fast blooms are one of the highlights of the Mesa™ Series. Extreme drought tolerance translates to a winning performance in the rock garden, cut flower garden, border or container. Foliage is 16-18" tall. Plant 24" apart.

- Zones 6 - 9
- Cultivar

Galium odoratum Sweet Woodruff
Galium is an herb-like ground cover with whorled shiny-green leaves that hug the ground at about 6", it pros- pers in the shady, moist, well-drained, slightly acidic soil site it loves best. Fragrant tiny white flowers are a bonus in May and June. The foliage is fragrant when dried. Galium works well under shrubs or in a naturalized area. Plant 18" apart.

- Zones 3 - 9
- F

Gaura lindheimeri 'Siskiyou Pink'
Pink Gaura
Clusters of nodding small flowers are pink with white tints here and there on arching stems above green foliage. Suitable to hot summers, this native Pink Gaura is gorgeous in the border all summer in a natural, informal way. Height is about 30". Try Gaura with low-mounding perennials like the Verbenas, Geraniums, or Sedums. Plant 18" apart.

- Zones 5 - 9
- Cultivar

Gentiana 'True Blue'
Gentian
Just before the flowers open they have a striking resemblance to old-fashioned blue holiday light bulbs. Deep 'Gentian' blue flowers bloom from bottom to top of the upright foliage in mid-summer to early fall. Well-branched foliage with somewhat glossy lance-shaped leaves form 18" tall clumps. PP20433 Plant 18" apart.

- Zones 4 - 7
- F

Geranium cantabrigiense 'Karmina'
Cranes Bill
In late spring this cousin of 'Biokovo' hosts lovely rose-purple flowers above fragrant green foliage. An outstanding ground cover, the foliage spreads quickly and uniformly and shows off a beautiful reddish-orange color in fall. 'Karmina' reaches 10-12" in height and prefers average to most well-drained soil. Plant 18" apart.

- Zones 5 - 8
- F

Geranium succulentes 'Alba' Cezanne
Dianthus
These dianthus are one of the most eye-catching flowers available in early spring. A remarkable non-fading flower garden, border or container. Foliage is 18-24" tall. Plant 36" apart.

- Zones 5 - 8
- F

Geranium 'Canadense' (syn. 'Hesperis' var. stratiotes)
Cranes Bill
Cranes Bill
A delightful cranes bill with its bit of salmon-pink flowers with a crimson vein will continue to bloom into late summer. Use in the sunny border, ideal for the cottage garden, and in pots and hanging baskets. Plant 18" apart.

- Zones 5 - 8
- F

New for 2019
Gold = Sun, Green = Shade + level deer resistance
(see page 7 for program details)
**Geranium sanguineum**

- **'Album'** Bloody Cranes Bill
  - Album has clear white flowers at 10-18". Notoriously tolerant of heat and cold, the sanguineums will flower well if provided partial sun (or even full sun if irrigation is possible during droughty summer times), but good drainage is essential. Blooming for 6-8 weeks, it will combine well with many other perennials to brighten garden designs from June through July. Plant 18" apart.

- **'Max Frei'** Cranes Bill
  - Popular for its compact, fast-growing, attractive foliage and profusion of dependable deep magenta flowers from June into August. What a hardy groundcover at 6-10". Plant 18" apart.

**Geranium x oxonianum**

- **'Wargrave Pink'** Cranes Bill
  - This vigorous hardy Geranium with its pink flowers grows well in open woodlands or in rocky mixed borders where it can weave and climb among other plants. Through June and July it will delight you as it hangs over walls, looks great in containers, or covers spent bulb foliage at a height of 12-15". Try it with Artemisia or the variegated foliage Phalaris for a bright look. Plant 18" apart.

**Geranium x 'Rozanne'**

- Perennial Plant of the Year 2008
  - Now considered one of the longest-blooming Geraniums introduced, expect large 2" violet-blue flowers with a white center from June to frost. It grows about 20" tall and 24" wide. If Geraniums are your passion the heat tolerance of ‘Rozanne’ makes her irresistible. Expect a red fall foliage display after a summer of deep green slightly marbled leaf color. PP121375 Plant 24" apart.

**Gypsophila repens 'Alba'**

- Creeping Baby’s Breath
  - Adorable petite white flowers bloom in profusion covering the grey-green foliage from early to mid-summer.Trimming back immediately after the first flowering will encourage re-blooming. At 4-6" tall, the creeping foliage will drape over rock walls or spill out of containers. Well drained light soil is essential for winter survival and plant is drought tolerant once established. Plant 12" apart.

**Hedera helix 'Baltica'**

- Baltic Ivy
  - The dark green evergreen leaves have distinctive white veins and are slightly smaller than H. helix, climbing rapidly up to 40 ft to a height of 8-12" as a ground cover. Plant 6-12" apart.

**Helenium autumnale**

- **Marichi™ 'Salsa'**
  - Helen’s Flower, Sneezeweed
  - This native provides a never-ending supply of golden-yellow semi-double long-stemmed daisies that resemble small sunflowers, above glossy deep green foliage. Great for cutting and attracting butterflies and other pollinators. We have chosen it for its more compact growth habit at 3-4’ than other Heleniums. Plant 18" apart.

- **'First Light'** Willow Leaf Sunflower
  - Blooms of golden yellow have dark brown eyes in mid fall. A sturdy self-supporting sunflower with narrow elongated foliage to 4" tall, this makes it great for planting in the back of the border. Try leaving the stalks and seed heads up in the winter for seasonal appeal and food for the birds. PP913150. Plant 24" apart.

**Helianthus x 'Lemon Queen'**

- Lemon Queen Sunflower
  - This tall and stately perennial sunflower will reach 5’-8’ high and blooms in July-September. Single layered lemon yellow flowers are 2" across, offering masses of simple daisies. It is drought tolerant and low maintenance for naturalistic gardens. Plant 24" apart.

**Helioptis helianthoides**

- **'Summer Sun'** False Sunflower
  - This native provides a never-ending supply of golden-yellow semi-double long-stemmed daisies that resemble small sunflowers, above glossy deep green foliage. Great for cutting and attracting butterflies and other pollinators. We have chosen it for its more compact growth habit at 3’-4’ than other Helioptis. Plant 18” apart.

**Baltic Ivy**

- Attracts Butterflies/Hummingbirds
  - 'Fantastico' Slightly taller than other Heliopsis. for its more compact growth habit at 3-4’. This native provides a never-ending supply of golden-yellow semi-double long-stemmed daisies that resemble small sunflowers, above glossy deep green foliage. Great for cutting and attracting butterflies and other pollinators. We have chosen it for its more compact growth habit at 3-4’ than other Helioptis. Plant 18” apart.

**English Ivy**

- Hedera helix
  - As a groundcover ivy will choke out weeds and provide glossy deep green cover year round. Foliage grows 12” high. Vigorous as a climber of walls or other upright structures, it can eventually reach up to 100’. 2” to 4” leaves are dark green with white veins. Provide partial shade and protection from winter damaging winds. Due to its aggressive nature, take care to avoid planting near unmanaged woodlands or other sensitive areas. Plant 6-12’ apart.
Helleborus orientalis 'Brandywine'
Lenten Rose
This is a wonderful introduction from long time hellebore breeder, David Cup. The flower colors will vary from white, yellow, pink, burgundy and purple to nearly black on single, semi-double and double blooms. It blooms in early spring with rose evergreen foliage and grows to 18" in height. Plant 18" apart.

Helleborus orientalis ‘Anna’s Red’
Lenten Rose
New foliage emerges bronze-green with hot pink veins and deep purple buds and reddish-purple flowers are held on dark red stems in late winter. Leaves age to dark green with cream marbling and outward-facing blooms continue lustfully into spring. Grows 18-24" tall and wide. PP34270 Plant 18" apart.

Helleborus x Frostkiss® 'Dorothy’s Dawn'
Lenten Rose
Another exceptional late blooming Hellebore from the Frostkiss® Series with foliage similar to “Penny’s Pink” and pink and purple outward facing flowers that are long lasting from February to April. Grows 24" tall and wide. Plant with spring blooming bulbs, Gallium and ferns. PPAF Plant 24" apart.

Helleborus x Frostkiss® Pippa’s Purple®
Lenten Rose
Silver mottled deep green foliage offers a stunning backdrop to the outward-facing burgundy flowers that have darker purple speckles. Grows 24" tall. Exceptionally long blooming from February to April, Frostkiss® Hellebores emerge from the cold and often snow covered ground to welcome spring and continue a show of lasting deer-resistant color for weeks. PPAF Plant 24" apart.

Helleborus x Frostkiss® Reanna’s Ruby™
Lenten Rose
Beautiful marbled foliage is topped with ruby-red flowers in late winter to early spring. Each flower has dark burgundy speckles. Mounded foliage grows 24" tall. Exceptionally long blooming from February to April. Prefers humus-rich, moist, well-drained soil. PPAF Plant 24" apart.

Helleborus x Frostkiss® 'Molly’s White'
Lenten Rose
Heavily silvered deep dark green foliage and dark stems hold pure white flowers from February to April. The outward-facing blooms are a beauty to behold in the early spring garden as winter slowly fades. Clumps grow 24" tall by 24" wide. PP25685 Plant 24" apart.

Helleborus x Frostkiss® 'Penny’s Pink'
Lenten Rose
Penny blooms a delightful mauve pink from late winter to mid-spring, but that’s not all! The spring foliage starts out bronze-green with deep pink veins and purple stems and is especially nice against the early purple flower buds. As the season progresses the veins become bright green, complimenting the long-lasting pink flowers. 18-24" tall. PP24149 Plant 24" apart.

Helleborus x Frostkiss® 'Pink’s Purple'
Lenten Rose
New foliage emerges bronze-green with deep purple buds and reddish-purple flowers are held on dark red stems in late winter. Leaves age to dark green with cream marbling and outward-facing blooms continue lustfully into spring. Grows 18-24” tall and wide. PP34270 Plant 18” apart.

Helleborus x Frostkiss® 'Ivory Prince'
Lenten Rose
This hybrid has attractive blue green, evergreen foliage. 12-18" in height. Blooms late winter to early spring with pink flushed buds that open up to ivory blooms streaked with rose and chartreuse. Combine with shade tolerant ground covers such as Ajuga, Lamium and Phlox stolonifera. PP16199. Plant 18” apart.

Helleborus x Frostkiss® 'Pink Frost'
Lenten Rose
Welcome sights in February after a long cold winter are the burgundy buds and dusty pink to white blossoms that mature to a rosy red and continue to bloom into April. Imagine the deep green silvery brushed foliage and the burgundy stems and buds emerging 12-15” above a snow dusted garden. Spring is around the corner! PP21163 Plant 18” apart.

Helleborus x Frostkiss® 'Champion'
Lenten Rose
Dark green foliage with silver veins is topped with white flowers that have a chartreuse center and age to pale green. Grows 24” tall. Exceptionally long blooming from February to April, Frostkiss® Hellebores emerge from the cold and often snow covered ground to welcome spring and continue a show of lasting deer-resistant color for weeks. PPAF Plant 24” apart.

Helleborus x Frostkiss® 'Pippa’s Purple'
Lenten Rose
Silver mottled deep green foliage offers a stunning backdrop to the outward-facing burgundy flowers that have darker purple speckles. Grows 24” tall. Exceptionally long blooming from February to April, Frostkiss® Hellebores emerge from the cold and often snow covered ground to welcome spring and continue a show of lasting deer-resistant color for weeks. PPK37121 Plant 24” apart.

Helleborus x Frostkiss® 'Moondance™'
Lenten Rose
Frostkiss® Hellebores emerge from the cold and often snow covered ground to welcome spring and continue a show of lasting deer-resistant color for weeks. New for 2019.

Helleborus x Frostkiss® 'Pink’s Purple'
Lenten Rose
New foliage emerges bronze-green with deep purple buds and reddish-purple flowers are held on dark red stems in late winter. Leaves age to dark green with cream marbling and outward-facing blooms continue lustfully into spring. Grows 18-24” tall and wide. PP34270 Plant 18” apart.

Helleborus x Frostkiss® 'Lenten Rose'
Lenten Rose
This first year blooming Hellebore comes with gorgeous marbled foliage that offers a stunning backdrop to the outward-facing white flowers. Exceptionally long blooming from February to April, Frostkiss® Hellebores emerge from the cold and often snow covered ground to welcome spring and continue a show of lasting deer-resistant color for weeks. PPAF Plant 24” apart.

Helleborus x Frostkiss® 'Glenda’s Gloss'
Lenten Rose
New for 2019. Heavily silvered deep green foliage and dark stems hold pure white flowers from February to April. The outward-facing blooms are a beauty to behold in the early spring garden as winter slowly fades. Clumps grow 24” tall by 24” wide. PP25685 Plant 24” apart.

Helleborus x Frostkiss® 'Champion'
Lenten Rose
This party starts in late winter as the creamy white outward-facing blooms begin to appear above mottled grey green foliage with distinct silvery veins. Blooms fade to green and continue into early spring. Grows 18” tall. PP22021 Plant 18” apart.

Helleborus x Frostkiss® 'Welcome Home'
Lenten Rose
New for 2019. Heavily silvered deep green foliage and dark stems hold pure white flowers from February to April. The outward-facing blooms are a beauty to behold in the early spring garden as winter slowly fades. Clumps grow 24” tall by 24” wide. PP25685 Plant 24” apart.

Helleborus x Frostkiss® 'Melody Pink'
Lenten Rose
New for 2019. Heavily silvered deep green foliage and dark stems hold pure white flowers from February to April. The outward-facing blooms are a beauty to behold in the early spring garden as winter slowly fades. Clumps grow 24” tall by 24” wide. PP25685 Plant 24” apart.

Helleborus x Frostkiss® 'Graceful Snow'
Lenten Rose
New for 2019. Heavily silvered deep green foliage and dark stems hold pure white flowers from February to April. The outward-facing blooms are a beauty to behold in the early spring garden as winter slowly fades. Clumps grow 24” tall by 24” wide. PP25685 Plant 24” apart.

Info
**Helleborus x hybridus**

**Winter Jewels™**

This phenomenal collection of Helleborus orientalis hybrids is singles and doubles in remarkable colors with large 3-4" diameter dropping flowers. All are profuse bloomers and have been hand-bred and selected by one of the world's best Helleborus hybridizers, Marietta O'Byrne.

Plant 18" apart.

**Zones 4 - 9**

---

**Winter Jewels**

**‘Apricot Blush’** Peachy yellow to apricot single with rose-pink veins and picotee edges. 18-22" tall.

**‘Blue Diamond’** Blush-purple single blooms. 10-12" tall.

**‘Cherry Blossom’** Blooms have cherry red edges and veins with a red starburst center. 18-22" tall.

**‘Cotton Candy’** Charming doubles in shades of light pink. Grows 12-14" tall.

**‘Golden Lotus’** A vigorous grower with fully double flowers in shades of yellow. Grows 18" tall.

**‘Jade Tiger’** Double green flowers have red-edged petals. Grows 10-14" tall.

**‘Onyx Odyssey’** Near black double flowers with contrasting creamy yellow stamens. Grows 18-22".

**‘Peppermint Ice’**

**‘Peaches & Cream’**

**‘Ruby Wine’** Burgundy single flowers are cup-shaped with contrasting white stamens. 18-22".

**‘Sparkling Diamond’** Double pure white blooms. Grows 11-15" tall.

---

**Hemerocallis**

**‘Bonanza’**

A soft orange-yellow with a reddish-brown center, ‘Bonanza’ reaches 24", blooming in July and August. All our Daylily varieties are easy to grow, withstand neglect, are adaptable to different types of soil, and are wonderfully heat and drought tolerant.

Plant 18" apart.

**Zones 4 - 9**

---

**‘Cherry Cheeks’**

Rose pink with a yellow-green throat, this pretty Daylily grows to about 33", blooming in July and August. Daylilies require at least 6 hours of sun a day for best performance, but can handle part shade.

Plant 18" apart.

**Zones 4 - 9**

---

**‘El Desperado’**

The mid to late summer blooms of this award-winning variety are buttery yellow with a prominent maroon eye that is notched at the mid-rib. Red picotee edges that run half way up the petals and the chartreuse throat add to the appeal. Quite vigorous and hardy. Grows 28" tall.

Plant 18" apart.

**Zones 4 - 9**

---

**‘Gail’s Fragrant Treasure’**

Rick Watson is proud to introduce this beautiful new cultivar. Named after his wife Gail, this fragrant daylily has large light yellow flowers with curved ruffled edges. Flowers are fade resistant with a very long blooming season from June until October. Height 22", Bloom Size 4.5". A heavenly fragrant daylily, it is delicate but sturdy and a long lasting continuous rebloomer. One of the longest blooming daylilies!

Plant 18" apart.

**Zones 4 - 9**

---

**‘Happy Returns’**

An unusual soft, lemony-yellow Daylily on 18" stems, this is a repeat bloomer starting in June and producing its small, ruffled flowers off and on until October. It combines well with any other color shade, looks fantastic in mass plantings, and will please you when you see its habit of opening in the evening.

Plant 18" apart.

**Zones 4 - 9**

---

**‘Chicago Apache’**

A hardy, vigorous grower, this rich scarlet red Daylily shows up well in the landscape when it blooms in June and July at a height of 27". Place in the sunny border with Leucanthemum ‘Snow Lady’, Schizachyrium ‘Standing Ovation’, and Agastache ‘Kudos’ Yellow.

Plant 18" apart.

**Zones 4 - 9**

---

**‘Catherine Woodbury’**

Delicately pale pink and cream with a throat of glowing chartreuse, ‘Catherine Woodbury’ works well with other pastel shades, grows to 30", blooming in June and July. Combine with Erigeron speciosus, Leucanthemum ‘Becky’, and Achillea ‘Oertel’s Rose’.

Plant 18" apart.

**Zones 4 - 9**

Hemerocallis ‘Hyperion’ Daylily
Another old-fashioned favorite, ‘Hyperion’ has very large, canary yellow flowers that reach 40” or so in July and August. Graceful and charming, its lovely fragrance is a delightful bonus. Known as a great cut flower. Try with Achillea ‘Strawberry Seduction’ and Salvia ‘Carmine’. Plant 18” apart.

Hemerocallis ‘Joan Senior’ Daylily
Considered one of the best, if not THE best, near-white Daylily, ‘Joan Senior’ is a multiple award winner. It has 6” lightly ruffled flowers in June and July at 25” and it is considered a rebloomer. Place in the sunny border with Monarda ‘Balm‘, Echinacea ‘Butterfly Kisses’ and Allium ‘Millenium’. Plant 18” apart.

Hemerocallis ‘Little Grapette’ Daylily
This dwarf variety produces loads of deep purple blooms in early to mid-summer. Flowers have tightly ruffled petals and a neon green throat. Overall height is 18”. ‘Little Grapette’ will combine well with Sedum John Creech and Salvia ‘Snow Hill’. Plant 18” apart.

Hemerocallis ‘Lullaby Baby’ Daylily
Palest pink blooms in June and July at about 20” are delightful on this All-America Daylily selection. The delicate fragrance is an added bonus. Great gift for that new mother you know. Use with Calamagrostis ‘Karl Foerster’, Achillea ‘Moonshine’ and Physostegia ‘Pink Manners’. Plant 18” apart.

Hemerocallis ‘Mary Todd’ Daylily
An award winning all-time favorite, with bright yellow 6” bloom. Each 22” plant will provide a huge splash of color in your garden during June and July. Vibrant in the sunny border with Kniphofia ‘Flamenco’ and Echinacea Butterfly ‘Orange Skipper’. Plant 18” apart.

Hemerocallis ‘Pandora’s Box’ Daylily
Vigorous, fragrant, creamy white flowers are 4” in diameter with a large cranberry-purple eye. Blooms in early to midsummer and is a repeat bloomer. Widely adaptable to various growing conditions, it will grow 20-24” tall. Use with Dianthus ‘Burgundy Blush’, Monarda ‘Raspberry Wine’ and Bouteioulas ‘Blonde Ambition’. Plant 18” apart.

Hemerocallis ‘Pardon Me’ Daylily
A deep, burgundy-red rebloomer with a chartreuse throat; this multiple prize winner starts blooming in June and continues off and on into the fall. Considered a miniature due to its small bloom size (3 1/4”), it reaches a height of 18”. Try with Sedum sieboldii, Rudbeckia fulgida var. fulgida and Salvia ‘Blue Hill’. Plant 18” apart.

Hemerocallis ‘Purple de Oro’ Daylily
AKA ‘Razzmatazz’, which says it all! Starting in June, the 2.5” purple rose flowers with ruffled petals, yellow throats and dark purple veins, jaz up the garden. Rebloomer occurs off and on atop to early summer until late summer. Plant 18” apart.

Hemerocallis ‘Rosy Returns’ Daylily
Another re-blooming daylily to add to your collection, this one has a wonderful rose-pink flower with a darker rose-purple eye and a vibrant yellow throat. ‘Rosy Returns’ grows 14-18” tall and is a repeat bloomer from June to frost. Try with Echinacea ‘Pica Bella’, Phlox ‘Astra Pink’ and Veronica ‘White Whizzer’, PP99779. Plant 18” apart.

Hemerocallis ‘Strawberry Candy’ Daylily
Pink blooms have a deep rose red eye zone and clean deep green foliage. A beautiful pink rebloomer, this multiple prize winner is 26” tall, with 4” blooms, starts flowering in June and June, and does so off and on into fall. Try with Agastache ‘Blue Fortune’, Leucanthemum ‘Becky’ or Pincan ‘Heavy Metal’. Plant 18” apart.

Hemerocallis ‘Summer Wine’ Daylily
The dusky rose-pink flower has achartreuse throat with sturdy stems, along with vigorous foliage, which is wider than that on many Daylilies. It blooms mid-season in June-July reaching about 24”. Combine with Achillea ‘Oertel’s Rose’ and Salvia ‘Rose Marvel’ for a long blooming rose-pink display. Plant 18” apart.

Heuchera americana ‘Dale’s Strain’ Coral Bells
Has unique silvery blue mottled over green leaves with darker purple veining growing 15-18” tall. You really need to buy it for its foliage, but it does bloom in the spring with white flowers. It is a seed propagated strain selected by Dale Hendrickx, thus the name Dale’s Strain. Plant 18” apart.

Heuchera americana ‘Palace Purple’ Coral Bells
This multiple award winner is perhaps the most popular Daylily of all time, and is definitely our most popular variety. Bright golden yellow flowers begin blooming in June and continue off and on through late summer on 12” stems. Use it in borders, on a bank, in containers on a patio or deck, or make a Daylily bed of Stella de Oro’ by itself. Try it with Salvia ‘Blue Hill’ for a stunning color combination. Plant 18” apart.

Heuchera americana ‘Palace Purple’ Coral Bells
Perennial Plant of the Year 1991 ‘Palace Purple’ has it all—beautiful showy white flowers on wiry purple stems at 18-24”, and purple-bronze bronze foliage with a pink underside. Flowers appear in June. The foliage color holds best in partial shade. Plant them in the border in clumps, as edging, or in nooks in the rock garden. While complimentary perennial combinations are endless for ‘Palace Purple’, try it with the silvery blue leaves of Hosta ‘Halcyon’, and any of our Siberian Iris. Plant 18” apart.

Heuchera micrantha ‘Peachy Purple’ Coral Bells
Cultivar

The Perennial Farm is “The Delivery Specialist” with deliveries to most locations 2-3 times per week.
Heuchera villosa 'Autumn Bride'
Coral Bells
This native selection is remarkably attractive in the landscape with its simple light green foliage and beautiful tall wands of creamy white flowers in late summer to fall. Foliage grows 15" tall and wide. Try with pink Begonia grandis and the deep blue hooded spikes of Aconitum. Plant 18" apart. Zones 4 - 9. Cultivar

Heuchera x villosa 'Frosted Violet'
Coral Bells
'Frosted Violet' gives us four seasons of beautiful foliage. New leaves emerge pinkish-purple and then take on a silvery tone, eventually aging to deep maroon-purple with darker violet veins and plum undersides. Foliage forms a mound 20" tall and wide. Tiny pink flowers appear on dark purple wiry stems in late spring. PP#21885 Plant 24" apart. Zones 4 - 9 Cultivar

Heuchera x villosa 'Georgia Peach'
Coral Bells
Peachy colored leaves have a white overlying start in the spring that changes through the season to rose purple in the fall/winter. Mounding foliage grows 14" tall. Creamy white blooms in midsummer. Give it a try with Carex Bowles Golden, Tiarella Brandywine and Geranium Brookside. PP#18975 Plant 18" apart. Zones 4 - 9 Cultivar

Heuchera villosa 'Snow Angel'
Coral Bells
Throughout the doughty summer our trial crops of 'Snow Angel' looked fat and happy. The bright variegated light green and cream mottled leaves are smallish, making tidy clumps at 12" in the part-shade garden. Pink blooms in June above the arresting foliage are an added bonus. Plant 18" apart. Zones 3 - 8. Cultivar

Heuchera villosa 'Berry Timeless'
Coral Bells
Dr. Alan Armitage reminds us that Heuchera were originally bred for the cut flower market and this new variety takes us back to the good old days with its gorgeous blooms. Light pink flowers are combined with aged rose-red blooms on the stiff 18" scapes from early summer to frost. Mounding 8-10" tall mint green foliage gives gardeners a two for one performance. PP#26357 Plant 18" apart. Zones 4 - 9. Cultivar

Heuchera x villosa 'Berry Smoothie'
Coral Bells
Representing the rose-purple spectrum, spring foliage of rose-pink darkens to a cool and refreshing deep berry-cise with purplish veining. Spreading out to 20" and growing to 18" tall, the heat-tolerant foliage has white coral bells in mid-summer. Pretty exciting with Dicentra ‘Gold Heart’ and Euphorbia ‘Ascot Rainbow’. PP #21871. Plant 18" apart. Zones 3 - 8. Cultivar

Heuchera villosa 'Frosted Violet'
Coral Bells
'Frosted Violet' gives us four seasons of beautiful foliage. New leaves emerge pinkish-purple and then take on a silvery tone, eventually aging to deep maroon-purple with darker violet veins and plum undersides. Foliage forms a mound 20" tall and wide. Heuchera x 'Plum Pudding’  
Coral Bells

The richest dark plum-purple foliage of this popular Heuchera has a silvery variegation and is deeply ruffled and tight. Pale pink flower clusters appear in June and July at 18”. Try it with yellow-leaved Hosta such as ‘August Moon’, or as a contrast for silver or brightly variegated perennials such as Pulmonaria ‘Spilled Milk’, Variegated Carex or Liropes, Lamiums, or Japanese Painted Ferns. Plant 18” apart.

Heuchera x 'Silver Scrolls’  
Coral Bells

Metallic silvery leaves have deep wine-red scalloped borders, veins, and undersides. The overall effect is a rich burgundy glow. Trim and tidy, “Silver Scrolls” at 12-18” is a vigorous grower with creamy white June flowers from pink buds. Evergreen by nature, it will respond to seasonal light levels with rich purple foliage color in winter and more silvery overtones in spring. PP#12006. Plant 18” apart.

Heuchera x 'Stainless Steel’  
Coral Bells

The new leaves in spring are stunning as they emerge silver with light maroon veining. Leaves mature to pale green with a silvery overlay and purplish-red undersides. Wiry flower stems in late May hold pink buds followed by creamy white flowers above the 8-12” foliage. A survivor in tough mid-Atlantic winters and hot humid summers! PP#23454. Plant 18” apart.

Heuchera x 'Timeless Treasure’  
Coral Bells

Like 'Berry Timeless’ this new introduction has showy flowers and a long blooming habit with colorful dark-veined silvery foliage. Vibrant rose-pink flowers bloom from early summer to fall on mounding foliage above 8-10” mounded foliage. Try with Anemone ‘Pocahontas’, ‘Atoll’ Vision in White’, Hakonechloa ‘All Gold’ and Ghost Fern. PP# Plant 12” apart. Photo courtesy of Walters Gardens, Inc.

Heucherella 'Blue Ridge’  
Foamy Bells

A misty blue hue is cast over the green leaves and contrasted with deep burgundy-red veins. Pure white flowers in April. 5-6” foliage. A strong performer in heat and humidity. At home in the Blue Ridge with Northern Maidenhair Fern, Oenothera ‘Luxuriant’ and Phlox ‘May Breeze’. PP#22169. Plant 12” apart.

Heucherella 'Solar Eclipse’  
Foamy Bells

New leaves of lime-green with reddish splashes are eclipsed by solid dark reddish-brown centers as the season progresses. Scalloped lime-green mar-gins add to the phenomenal appearance. White bell-shaped flowers on wiry stems appear above the 10-15” tall foliage in spring. A show stopper in containers or the shade garden. PP#23647. Plant 15” apart. Photo courtesy of TERRANOVA® Nurseries, Inc.

Heucherella 'Stoplight’  
Foamy Bells

White flowers are produced on 12” stems in spring, but the bright foliage is the centerpiece of this eye-catcher. Vivid yellow leaves are marked with a dark red blotch in the center and throughout the veins. The mounding foliage reaches 6” in height. Eye catching with Astilbe ‘Montgomery’ and Ajuga ‘Black Scallop’. PP#16835. Plant 12” apart.

Heucherella 'Sweet Tea’  
Foamy Bells

Foliage of rich orange tea color with a reddish brown star or veining in the center of the real eye-catcher. Vivid yellow leaves are deeply lobed and grow to 20” tall. Its big mounding habit and heat tolerance comes from the Heucherella villosa side of the family. Small white flowers in early summer. Try with Christmas Fern and Carex Bunny Blue’. PP#21296. Plant 18” apart.

Heucherella 'Xanadu’  
Foamy Bells

A vivid blue-green shade plant with eye-catching bright green leaves and a reddish brown star veining in the center of the eye-catcher. Vivid yellow leaves are deeply lobed and grow to 20” tall. Its big mounding habit and heat tolerance comes from the Heucherella villosa side of the family. Small white flowers in early summer. Try with Christmas Fern and Carex Bunny Blue’. PP#21296. Plant 18” apart.

Hibiscus moscheutos ‘Lady Baltimore’  
Hardy Hibiscus

Located as we are on Baltimore City’s doorstep, it seems only fitting to add ‘Lady Baltimore’ to our Hibiscus repertoire. Big deep pink blooms sport a red eye zone from July-September with deep green cut leaf foliage. Plant on a mature 4.5” size when located in the moist, well-drained soil Hibiscus prefer. Plant 24” apart.

Hibiscus moscheutos ‘Lord Baltimore’  
Hardy Hibiscus

Huge 9-12” ruffled crimson-red, saucer-shaped flowers are spaced evenly among dark green cut leaf foliage. This incredible show begins in late July and can continue into September. The 5-6” plants give rave reviews wherever they appear. Plant 24” apart.

Hibiscus moscheutos ‘Luna Series’  
Hardy Hibiscus

Sturdy, compact, well-branched foliage produces 7.8” diameter flowers in deep burgundy red, vibrant pink and purple shades. A mid-sized plant. Blooms from mid-summer to early fall with multiple showy blooms in a single day. 2-3” tall. Plant 24” apart.

Hibiscus x ‘Fantasia’  
Hardy Hibiscus

This heavy flowering hybrid rose-pink flowers with a red eye that are 8-9” in diameter. The large flowers sit atop 3” tall mounded shrub like foliage. Blooms from midsummer until early fall. ‘Fantasia’ has distinctively lobed, maple like leaves which add to the beauty of this Hibiscus. Companions include Filipendula rubra ‘Venusta’ and Physostegia ‘Miss Manner’. PP#11853. Plant 24” apart.

Hibiscus x ‘Kopper King’  
Hardy Hibiscus

The startling contrast of copper-red leaves and large white flowers with a red eye zone with some red streaking (through its veination) made our trial crops of ‘Kopper King’ one of the most talked-about perennials in the nursery. Blooming from late July into September at 3-4’, foliage color and flower count will benefit from lots of sun and moist soil. Plant 24” apart.

Hibiscus x ‘Midnight Marvel’  
Hardy Hibiscus

Well-branched foliage with violet-pur-
tple leaves makes a marvelous backdrop to the scarlet-red blooms that begin in mid-summer. The 8” diameter flowers continue into September as the leaves begin their change to intense orange. Mounded foliage grows 5” tall and wide. PP#24079. Plant 48” apart.

Hibiscus x ‘Mars Madness’  
Hardy Hibiscus

Deep magenta-red blooms appear from top to bottom of the attractive foliage in mid to late summer. Olive green leaves with copper and purple hues frame the 6-8” day-long flowers. Use ‘Mars Madness’ as a foundation plant or in large spaces where its 4.5” tall and 6” wide foliage can take shape. PP#27838. Plant 6” apart.

Hibiscus x ‘Rose’  
Hardy Hibiscus

A mounding red-leaved Hibiscus that is the most popular of the ‘Luna Series’. Luna™ ‘Rose’. PP#16155. Plant 12” apart.

Hibiscus x ‘White’  
Hardy Hibiscus

A mounding white-leaved Hibiscus that is the most popular of the ‘Luna Series’. Luna™ ‘White’. PP#25162. Plant 12” apart.

Hibiscus x ‘Montgomery’  
Hardy Hibiscus

Large white flowers with a red eye zone with some red streaking (through its veination) made our trial crops of ‘Montgomery’ one of the most talked-about perennials in the nursery. Blooming from late July into September at 3-4’, foliage color and flower count will benefit from lots of sun and moist soil. Plant 24” apart.

Hibiscus moscheutos ‘Luna™ ‘Red’  
Hardy Hibiscus

Large red flowers with a red eye zone with some red streaking (through its veination) made our trial crops of ‘Luna™ ‘Red’ one of the most talked-about perennials in the nursery. Blooming from late July into September at 3-4’, foliage color and flower count will benefit from lots of sun and moist soil. Plant 24” apart.

Hibiscus moscheutos ‘Luna™ ‘White’  
Hardy Hibiscus

Large white flowers with a red eye zone with some red streaking (through its veination) made our trial crops of ‘Luna™ ‘White’ one of the most talked-about perennials in the nursery. Blooming from late July into September at 3-4’, foliage color and flower count will benefit from lots of sun and moist soil. Plant 24” apart.
The Perennial Farm is "The Delivery Specialist" with deliveries to most locations 2-3 times per week

Hosta x 'August Moon'
Plantain Lily
This medium-sized, heavily corrugated gold leaves characterize this fast growing Hosta, which blooms near white to 36" in August. It will definitely lighten up the dark corners of your shade garden. Lovely with Polygonatum 'Variegatum', Carex 'Gold Fountains' and Limelight Lady Fern.
Plant 24-30" apart.

Hosta x 'Big Daddy'
Plantain Lily
A quite sizable patron of the blue-leaved Hostas, 'Big Daddy' reaches 24" tall and 36" wide at maturity with rounded, puckered gray-blue leaves. Almost white flowers in mid to late summer top the large mounded foliage. Medium growth rate and good slug resistance.
Plant 48" apart.

Hosta x 'Blue Angel'
Plantain Lily
Large, deep blue foliage has near-white flowers in June and July making this slug-resistant Hosta an impressive landscape plant. Leaves can reach 12" across and 16" long making a graceful mound 4' by 4'. Height is 36' Try in a white garden with Hydrangea 'Annabelle' and Dicentra spectabilis 'Alba'.
Plant 48" apart.

Hosta x 'Blue Cadet'
Plantain Lily
A small, blue-green Hosta with dense mounds of heart-shaped leaves to about 12". Its bell-shaped flower is dark lavender in mid-summer. Blue Hostas need darker areas of shade and cool temperatures to hold their best blue color. Lighter shade and more sun will fade them to green. Combine with the bright and colorful foliage of Lysimachia 'Rara', Carex 'Gold Fountains' and Japanese Painted Fern.
Plant 24" apart.

Hosta x 'Empress Wu'
Plantain Lily
'Empress Wu' will elicit a few "wows!" with her remarkable 18" wide leaves and mature height of 4'. Violet flowers appear just above the deeply veined dark green leaves in early to mid-summer. While mature height will take several years to attain, the large leaves will 'impress you' the first season.
Plant 48" apart.

Hosta x 'Fire and Ice'
Plantain Lily
A sport of Hosta 'Patriot', the leaf color is reversed with a white center and dark green edges. In mid-summer lavender flowers appear above the foliage. It is considered a mid-size hosta growing 12-15" tall. Use in the shady border with Astilbe 'Delft Lace', Anemone 'Wild Swan' and Northern Maidenhair Fern.
Plant 15" apart.

Hosta 'fortunei'
Aureomarginata
Plantain Lily
Favored by Hosta lovers and experts, this award winner forms a 28" high mound of heavily corrugated, wide blue-green leaves with a broad golden yellow border. Near-white flowers in late June are displayed just above the handsome slug-resistant foliage. Plant 60" apart.

Hosta sieboldiana
'Elegans'
Plantain Lily
Large gray-blue leaves that are heavily textured and slug-resistant show color best in shade to light sun. White flowers bloom in June and July. At a height of 30", the foliage becomes more corrugated as it matures. Try it with Astilbe 'Pumila' and Japanese Painted Fern for a delicate and strong texture combination.
Plant 60" apart.

Hosta sieboldiana
'Great Expectations'
Plantain Lily
This variegated form of 'Elegans' has a center color that changes from yellow in spring to a creamy white by mid-summer. The leaves have wide blue-green margins (becoming green by mid-summer), are heavily corrugated, and resistant to slugs. Its near-white flowers open in mid-June. Mature leaves can be 10" wide by 12" long, and the mound at maturity can be 29" high by 58" wide. Plant 40" apart.

Hosta sieboldiana
'Frances Williams'
Plantain Lily
Favored by Hosta lovers and experts, this award winner forms a 28" high mound of heavily corrugated, wide blue-green leaves with a broad golden yellow border. Near-white flowers in late June are displayed just above the handsome slug-resistant foliage. Plant 60" apart.

Hosta sieboldiana
'Goldilocks'
Plantain Lily
Medium-sized, heavily corrugated gold leaves characterize this fast growing Hosta, which blooms near white to 36" in August. It will definitely lighten up the dark corners of your shade garden. Lovely with Polygonatum 'Variegatum', Carex 'Gold Fountains' and Limelight Lady Fern.
Plant 24-30" apart.

Hosta sieboldiana
'Great Lakes'
Plantain Lily
Large, deep blue foliage has near-white flowers in June and July making this slug-resistant Hosta an impressive landscape plant. Leaves can reach 12" across and 16" long making a graceful mound 4' by 4'. Height is 36'. Try in a white garden with Hydrangea 'Annabelle' and Dicentra spectabilis 'Alba'.
Plant 48" apart.

Hosta sieboldiana
'Sparkle Blue'
Plantain Lily
Medium-sized, heavily corrugated gold leaves characterize this fast growing Hosta, which blooms near white to 36" in August. It will definitely lighten up the dark corners of your shade garden. Lovely with Polygonatum 'Variegatum', Carex 'Gold Fountains' and Limelight Lady Fern.
Plant 24-30" apart.

Hosta x 'Shadowland®
'Coast to Coast'
Plantain Lily
Heavily corrugated golden yellow leaves unfold into a vase-shape and grow 28-30" tall and 36" wide. Morning sun improves gold color. Pale lavender flowers appear on 36" scapes just above the foliage in mid-summer.
PPR26489
Plant 30" apart.

Gold = Sun, Green = Shade + level deer resistance (see page 7 for program details)
Hosta ‘First Frost’  
Plantain Lily  
This sport of the pest resistant blue-leaved ‘Halcyon’ has creamy yellow margins in spring that eventually become white in mid-summer, surrounding a blue-green center. This medium sized Hosta grows 16” tall by 28” wide and has pale lavender flowers in summer. With good slug resistance the foliage looks nice right up to the first frost.  
Plant 30” apart.

Hosta ‘Francee’  
Plantain Lily  
Medium, heart-shaped, dark green leaves have sharply contracting white margins. The variegation holds up very well in quite a bit of sun throughout the growing season. Height is 28”. Try it in your shady garden with a lacy fern such as the Lady Fern or Hay-scented Fern, the shiny evergreen leaves of Bergenia, and Pulmonaria with its white-speckled foliage.  
Plant 40” apart.

Hosta ‘Gold Standard’  
Plantain Lily  
Watch the leaves of ‘Gold Standard’ emerge in the spring a light green with a dark green margin. By summer, the leaf center will turn a delicate parchement gold. A multiple award winner, Hosta experts recommend some morning sun to bring out the gold color. With medium height foliage at 18”, lavender flowers bloom in July. A rapid grower that will look great with Japanese Beech Fern, B egonia grandis and I beris ‘Snowflake’.  
Plant 48” apart.

Hosta ‘Golden Tiara’  
Plantain Lily  
A compact mound of small, heart-shaped leaves with a wide, golden margin, this popular Hosta shows good form, persistent color, and a fast clumping habit at 14” in height. Produces lavender flowers in July. Use in the shade border with Christmas Fern, Astilbe ‘Peach Blossom’ and Epimedium ‘Reneum’.  
Plant 36” apart.

Hosta ‘Guacamole’  
Plantain Lily  
Has large, well-rounded apple green leaves margined by a wide dark green edge, growing 18-22” tall. Blooms in August, a large near-white fragrant flower. Guacamole is 2002 American Hosta Growers Hosta of the Year. Combine with Anemone, Astilbe and Painted Fern.  
Plant 18” apart.

Hosta ‘Halcyon’  
Plantain Lily  
Elegant, heart-shaped silvery blue leaves, are thick and heavily ribbed, forming a dense medium-height mound of about 18”. Pale lilac flowers open from July into August. Good slug resistance. Use in the front of the border with Hellebore and Japanese Painted Fern.  
Plant 36” apart.

Hosta ‘June’  
Plantain Lily  
A lovely medium-sized Hosta with a gold center bordered by blue and green shaded margins on painted leaves. The light center will bleach to creamy white in bright light, but has a nice heavy substance. Lavender flowers appear in July at about 16-20” on this attractive Hosta.  
Plant 30” apart.

Hosta ‘Krossa Regal’  
Plantain Lily  
A commanding presence in any shady setting, this classic Hosta is slug-resis tant and has frosty blue leaves that form an upright, vase-shaped clump around 3’ in height. The pale lavender flowers open in July. Combine with Pulmonaria ‘Trevi Fountain’, Rodgersia ‘Superba’ and Christmas Fern.  
Plant 48” apart.

Hosta ‘Paul’s Glory’  
Plantain Lily  
Blue to dark green leaf margins are striking next to the gold center on this fast-growing Hosta. We consider ‘Paul’s Glory’ a large cultivar reaching a mature-sized mound in 3 years at about 25” high by 55” wide. With good substance and intense leaf colors it is a sight to behold. Blooms are pale lavender in mid-July to early August above heart-shaped leaves. American Hosta Growers 1999 Hosta of the Year.  
Plant 48” apart.

Hosta ‘Patriot’  
Plantain Lily  
Its rich forest green center combined with the extremely wide, pure white margin make ‘Patriot’ an absolute knockout. Make this medium-sized (about 18”) Hosta a specimen in your shade garden. Works well with Hellebore, Anemone and Ferns.  
Plant 48” apart.

Hosta ‘Rainbow’s End’  
Plantain Lily  
Golden yellow leaves with irregular dark green margins and stripes form a small to medium clump 11” tall by 24” wide. In mid-summer unusual red scalpes rise up to hold dark lavender flowers. Combine with Aralia ‘Sun King’ and Dicentra ‘Luxurien’. P P#17251  
Plant 24” apart.

Hosta ‘Royal Standard’  
Plantain Lily  
Outstanding and dignified with its shiny, deep green leaves, ‘Royal Standard’ is sun-tolerant and a vigorous grower at about 32”. Best of all, a profusion of pure white flowers with a clean, fragrant beginning in late August. Mass in the woodland border or plant with Actaea racemosa and Physostegia ‘Miss Manners’.  
Plant 60” apart.

Hosta ‘Shade Fanfare’  
Plantain Lily  
A popular choice among our customers, its medium green slug-resistant leaves have a broad creamy margin. ‘Shade Fanfare’ has a foliage height of 18”, is a vigorous grower, and sports lavender flowers in July. It will lighten dark corners of your shade garden. Use with Astilbe ‘Snowdrift’, Anemone and Evergreen Wood Fern.  
Plant 48” apart.

Hosta ‘Sun and Substance’  
Plantain Lily  
This impressive winner of many awards has huge, chartreuse-green rounded leaves of very thick substance and grows to 30”. Tall stalks of pale lavender flowers bloom in late July. Slug-resistant. Combine with Aruncus dioicus or Actaea racemosa.  
Plant 72” apart.

Hosta ‘Wide Brim’  
Plantain Lily  
Heart-shaped leaves have irregular creamy yellow margins and form an 18” medium-sized mound. Open-faced light lavender flowers rise above the foliage in July. This Hosta has an excellent growth rate. Use in the shady border with New York Fern, Epimedium and Acorus.  
Plant 36” apart.
The Perennial Farm is “The Delivery Specialist” with deliveries to most locations 2-3 times per week.

Hypericum androsaemum ‘Albury Purple’
St. John’s Wort

The reddish-purple leaves are larger than those of our other Hypericums, and at 3”, this round, bushy semi-evergreen plant can serve as a distinctive border shrub, as a hedge, or even as an effective ground cover for a large area. The clusters of small yellow flowers in early summer are a good contrast to the leaves. Contrast with Geranium s. ‘Album’ and Heuchera ‘Autumn Bride’.
Plant 18” apart.

Hypericum calycinum

St. John’s Wort

Truly a low maintenance ground cover with the bonus of 3” bright golden flowers that first appear in June. A quick-growing thick green carpet reaches 15-18” high and will spread to 18-24” in one season. Try this great performer on a bare slope or bank. It tolerates poor soils, full sun or partial shade.
Plant 12” apart.

Hypericum moserianum ‘Tricolor’
St. John’s Wort

Tricolor is a compact mound planting with green leaves, edged with shades of pink and cream growing to 12” tall. Has buttercup like yellow flowers on red stems from mid-summer to fall. Grow in average, well-drained soil. Usually dies to the ground in cold winter climates.
Plant 18” apart.

Hypericum patulum ‘Hidcote’
St. John’s Wort

Same large yellow flowers as calycinum in May and June, but with taller and sturdier foliage at 2-3’. The semi-evergreen leaves can form a low hedge as well as serve as an effective ground cover.
Plant 18” apart.

Hypericum calycinum ‘Fiesta’
Variegated St. John’s Wort

This stoloniferous ground cover has woody stems with an arching habit. Long, narrow variegated leaves are medium green and creamy yellow and have a tinge of pink on new leaves. 12” tall foliage is topped with yellow flowers in early summer. Provide consistent moisture and well-drained soil. PP26400
Plant 30” apart.

Iberis sempervirens ‘Snowflake’
Candytuft

Cascading over a rock wall, at the front of the border, or in a rock garden, this popular evergreen dwarf has clusters of white flowers at 0-12” that appear from April to June. After flowering, it should be cut back to maintain the foliage and keep it compact. ‘Snowflake’ is an abundant bloomer with large green leaves and prefers well-drained alkaline soil.
Plant 18” apart.

Iris ensata ‘Happy Awakening’

Japanese Iris
Large violet-purple blooms have darker violet veins and a splash of yellow on the fall. The slightly arching sword-shaped leaves create a nice vase shape and add structure to the mixed border. Clumping foliage grows 36” tall. Japanese Iris blooms in late spring to early summer after the German and Siberian Iris have finished.
Plant 24” apart.

Iris cristata ‘Powder Blue Giant’

Dwarf Crested Iris
Sporting 3” powder blue flowers with gold colored falls, this wonderful spring bloomer has a vigorous growth habit that makes it useful as a groundcover. Grows 6-8” tall. Lovely with other native selections such as Aquilegia ‘Corbett’, Chrysogonium virginianum and Phlox ‘May Breeze’.
Plant 12” apart.

Iris cristata ‘’Tennessee White’

Dwarf Crested Iris
Take me back to good ole Rocky Top, home of this white form of the sweet Crested Iris. The 6-10” fan-like foliage spreads with enthusiasm and puts on a lengthy show of bright white flowers with pale yellow crests in late spring. Plant in dry shade or full sun with consistent moisture.
Plant 12” apart.

Iris ensata ‘’Lion King’

Japanese Iris
Large ruffled petals are splashed with white and a hint of yellow is visible in the throat. Sword-like foliage grows to 24-36” tall. Prefers moist, acidic soil. Blooms in late spring to early summer. Combine with Paeonia ‘Duchess de Nemours’, Allium ‘Millenium’ and Nepeta ‘Junior Walker’.
Plant 18” apart.

Iris germanica ‘Champagne Elegance’

Tall Bearded Iris

This bearded iris puts on a stunning presentation of sophistication with copious blooms in June and a repeat bloom in late summer. Fragrant flowers have near-white standards and light apricot ruffled falls with 7-10 buds per stem. Grows 34” tall. Plant 24” apart.

Zones 3 - 9

Iris germanica ‘Clarence’

Tall Bearded Iris

Beautiful re-bloomer with first blooms in late spring and then again in late summer to early fall. Light blue standards and ruffled violet-blue falls have large white beards. Flowers have a light fragrance. Grows to 35”. Try with Acanthus ‘Blue Ice’ and Gaura ‘So White’. Plant 24” apart.

Zones 3 - 9

Iris germanica ‘Feedback’

Tall Bearded Iris

Expect positive remarks from admirers of this intense violet-blue flowers with ruffled petals and yellow beards. Blossoms have a noticeably sweet fragrance, appearing in late spring and again in late summer. Strong stems to 36”. Will appreciate a little fertilizer after the first bloom. Plant 24” apart.

Zones 3 - 9

Iris germanica ‘Harvest of Memories’

Tall Bearded Iris

Bright yellow blooms with ruffled petals have a subtle sweet fragrance and appear in late spring. Grows to 36-38” tall. Tall bearded iris will not tolerate wet soils in winter and prefers moderate, well-drained moisture during the growing season. Plant 24” apart.

Zones 3 - 9

Iris germanica ‘Imortality’

Tall Bearded Iris

A wonderful companion to long-blooming roses, ‘Imortality’ begins to bloom in late spring and will continue off and on into fall. Flowers with pure white ruffled petals and pale lemon-yellow beards bloom on 29” tall stems and have a very noticeable sweet fragrance. Remove spent flowers to encourage re-blooming. Plant 24” apart.

Zones 3 - 9

Iris germanica ‘Pink Attraction’

Tall Bearded Iris

This beauty will be more like love at first sight with its soft pink fragrant flowers, ruffled edges and blooms that appear not only in spring but again in late summer to fall! 24-30” tall attractive sword shaped foliage with multiple budded stems that make lovely cut flowers. Plant 24” apart.

Zones 3 - 9

Iris germanica ‘Titan’s Glory’

Tall Bearded Iris

The huge violet-purple blooms are an amazing 6” tall and 5” across and will command attention when planted in large groupings. Long blooming in early May on 36” tall stems with 6-8 buds per stem. Plant 24” apart.

Zones 3 - 9

Iris laevigata ‘Variegata’

Variegated Japanese Water Iris

Wide sword-shaped leaves are medium green with cream and white stripes. Purplish-blue flowers have broad falls with a white crest and narrow upright standards. Blooms top 30-32” tall stems in mid to late spring. Plant in moist to wet, rich soil or shallow water (6-8”). A great addition to a water feature, moist border or pond. Plant 24” apart.

Zones 4 - 9

Iris sibirica ‘Caesars’ Brother’

Siberian Iris

Deep blue-violet is simply gorgeous on this most rugged and easy-to-grow 36” beardless Siberian Iris. It flowers in June, has deep roots making it somewhat drought-resistant, and is great for holding a steep bank in place. As each clump begins bigger over time, weeds are literally crowded out. It will easily tolerate a bit of shade in the heat of summer! Plant 18” apart.

Zones 4 - 9

Iris sibirica ‘Silver Edge’

Siberian Iris

From early to mid-summer the silver-edged light blue to dark blue flowers are accented with yellow and white beaks on the falls. After blooming, the 20” tall erect bluish-green grassy leaves are a graceful garden accent shimmering in the breeze. Try with Alchemilla mollis and Geranium ‘Rozanne’. Plant 18” apart.

Zones 4 - 9

Iris sibirica ‘Snow Queen’

Siberian Iris

Pure white characterizes this 30” beardless Siberian Iris. Relatively pest-free and easy to grow, the June flowers are medium-sized about 1.5” above the slender green leaves. Performs best in rich, moist soil, but will tolerate dry soil and part shade. Plant 18” apart.

Zones 4 - 9

Isotoma fluviatilis

Blue Star Creeper

Admire sky blue star shaped flowers bloom from late spring through summer. The medium green rounded leaves form a dense 2-3” mat and will creep between stepping stones or along a garden path. Tolerant of heavy foot traffic and a variety of moisture levels and soil types, it is ideal for use as a small area lawn replacement or planted around spring bulbs. Plant 10” apart.

Zones 5 - 9

Kniphofia uvaria

‘Flamenco’

Red Hot Poker, Torch Lily

This old garden favorite will that will brighten up a cloudy day! ‘Flamenco’ mixes up red, orange, and yellow flower spikes that reach 30-36” in summer. Green sword shaped foliage grows to 24” and is semi-evergreen. Plant in well drained soil, with absolutely no wet feet and cut back foliage to 3” in spring. Plant 18” apart.

Zones 5 - 9

Kalimeris incisa

Blue Star

Falls Aster-like blooms appear earlier in summer than others and continue for many weeks. The flowers are pale blue and appear in profusion on compact 18” tall foliage in June. A mid-summer trim will encourage continuous blooms into late summer. Kalimeris loves heat and humidity and is drought tolerant once established. Prefers well-drained soil in full sun. Plant 18” apart.

Lamiastrum galeobdolon

‘Herman’s Pride’

Yellow Archangel

The small green leaves with striking silver variegation form tidy mounds at 15–18”, which spread evenly in the high shade, and dry soil it thrives best. A dependable ground cover where little else will grow; the small yellow flowers are a bonus in May. A nice alternative to the Lamiums. Plant 18” apart.

 Zones 4 - 9

Lamium maculatum

‘Beacon Silver’

Dead Nettle

An especially good ground cover for shady areas under trees, ‘Beacon Silver’ seems to prefer a bit more shade than our other varieties. The metallic silver leaves are edged in green at 8”, the pink flowers are a bright contrast in April–July. And produces a bit bronze as our weather cools in fall. Plant 18” apart.

 Zones 4 - 9

Lamium maculatum

‘Red Nancy’

Dead Nettle

Shiny foliage at 8-10” with leaves of silver edged with green brighten up the shady garden. ‘Red Nancy’ sports very rosy pink flowers from April to July that contrast nicely with the shiny foliage. Lamium thrives in dry shade sites and is adaptable to a wide range of light conditions. An excellent ground cover choice for planting under shade trees or to fill in large areas quickly. Plant 18” apart.

 Zones 4 - 9

Lamium maculatum

‘Shell Pink’

Dead Nettle

The popularity of this hardy ground cover is understandable when you consider that it tolerates poor soils, spreads rapidly, thrives in dry shade sites, handles a range of light conditions, and has lovely green and white variegated foliage that shines in shady areas under trees. ‘Shell Pink’ has soft pink flowers close above the 8” foliage from April to July. Plant 18” apart.

 Zones 4 - 9

Lamium maculatum

‘White Nancy’

Dead Nettle

Vigorous in its spreading habit, ‘White Nancy’ has green-edged silver leaves with white flower clusters close to the 8” leaves from April to July. In the shade or semi-shade, its luminous leaves look cool and peaceful on a hot summer day. An excellent ground cover choice for planting under shade trees or to fill in large areas quickly. Plant 18” apart.

 Zones 4 - 9

Lavandula angustifolia

‘Hidcote’

English Lavender

Native to the western Mediterranean region, ‘Hidcote’ is a compact mounded form that grows 12-20” and produces deep violet-blue flower spikes July through August. The silvery-gray leaves are very fragrant and are useful, along with the flowers, in potpourris and sachets. ‘Hidcote’ was named for Munstead Woods in the high shade, and produces a bit bronze as our weather cools in fall. Plant 18” apart.

 Zones 6 - 9

Lavandula x intermedia

‘Phenomenal’

Fat-Spiked Lavender

‘Phenomenal’ is an exceptional lavender with dense foliage and a uniform growth habit, root and foliage disease resistance, and a bit more moisture tolerance than other selections. Fragrant silver foliage grows to 24-32” tall with lavender-blue flower spikes from late spring through summer. Good winter hardiness. Plant 24” apart.

 Zones 6 - 9

Lavandula angustifolia

‘Munstead’

English Lavender

A wonderful summer bloomer with light lavender-blue flowers and fragrant gray foliage that is compact at 12-18”. English lavender is also grown for its oils that are used in perfumes and the foliage that is used in potpourris and sachets. ‘Munstead’ was named for Munstead Woods in England where it was grown by British garden designer Gertrude Jekyll. Plant 12” apart.

 Zones 6 - 9

Lavandula angustifolia

‘Provence’

Lavender

‘Provence’ is a “mid-season blooming” Lavender with fragrant, dark violet flower spikes and silver gray, globular, bushy foliage. It flowers June-August to a height of 24-30”. On summer days, it has hefty fragrances that fill the air. Combine with Sedum ‘Autumn Joy’, Dianthus ‘Firewitch’, and Santolina. Plant 18” apart.

 Zones 6 - 9

Leptinella x ‘Platt’s Black’

Brass Buttons

The miniature leaves of dark bronze and green have a fern-like appearance and form a mat soft enough for a fairy to nap on. At only 2” in height the tiny foliage is ideal for filling in cracks and crevices, or planting between stones or in the rock garden. Petite yellow flowers are produced in spring. Provide afternoon shade and average moisture. Plant 12” apart.

 Zones 6 - 9

Gold = Sun, Green = Shade + level deer resistance (see page 7 for program details)
**Leucanthemum x 'Becky'**
Shasta Daisy

Perennial Plant of the Year 2003

Big, strong, familiar white daisies with the yellow center bloom for many weeks during July and August up to 36”. Shiny green leaves complement the flowers that never need staking. While average well-drained soil is fine, remember that good winter drainage is also important. It’s hard to think of a happier bloom in your midsummer fresh-cut arrangements, or nodding in a sunny border. Plant 18” apart.

Zones 5 - 9

---

**Leucanthemum x superbum 'Snow Lady'**
Dwarf Shasta Daisy

A truly exceptional variety that was an All-America selection for 1988, this dwarf grows to only 24–30” tall. It’s hard to think of a happier bloom in your midsummer fresh-cut arrangements, or nodding in a sunny border. Plant 18” apart.

Zones 5 - 9

---

**Liatris spicata 'Kobold'**
Purple Gay Feather

Imagine the rose-purple spikes of this Liatris grouped in the border. All the characteristics apply that we described for ‘Floristan White’, but in a striking purple that combines beautifully with oranges and yellow flowers. Grows 24-30” tall. Maintenance free and a butterfly magnet, it never needs dividing. Just cut back. Plant 24” apart.

Zones 5 - 9

---

**Ligularia dentata 'Desdemona'**

Leaves and flowers are both remarkable on this big, handsome plant for waterside or moist border. The large leaves are bronzy-green on the top and purple underneath. Orange-yellow daisy-like flowers in August can be nearly 3” across with brown centers. The branching stems grow to 3’ and are sturdy enough not to need staking. Prefers part shade to do its best. Plant 18” apart.

Zones 4 - 10

---

**Ligularia stenophylla**

Give this specimen plant some room and part shade. It will grow to 4’ or so with its long spikes of deep yellow flowers in late June. It has lots of large green triangular leaves with coarse jagged edges and stiff flower stems. Very effective near a stream or at the edge of a woodland. Plant 18” apart.

Zones 5 - 10

---

**Lilium Lily Looks™ 'Tiny Bee'**
Dwarf Asiatic Hardy Lily

Budding with color in early to mid-summer, these compact Qlases are offered in many bold and beautiful colors with very high bud counts and are perfect for the front of the rock garden, rock garden and containers or as a cut flower. ‘Tiny Bee’ blooms with bright yellow with black spots near the center of the flower. Grows 12-14” tall and has 5-7 buds per stem. PP#12655
Plant 12” apart.

Zones 3 - 9

---

**Lilium Lily Looks™ 'Tiny Heroes'**
Dwarf Asiatic Hardy Lily

Tangerine orange blooms are bright and cheerful. Grows 14-16” tall with 5 to 7 buds per stem. PP# Plant 12” apart.

Zones 3 - 9

---

**Lilium Lily Looks™ 'Tiny Pearl'**
Dwarf Asiatic Hardy Lily

Deep pink flowers with 5-7 buds per stem. Grows 14-16” tall. PP#22874
Plant 12” apart.

Zones 3 - 9

---

**Lilium Lily Looks™ 'Tiny Padhye'**
Dwarf Asiatic Hardy Lily

Bi-color blooms are white at the tips of the petals with deep burgundy centers. Grows 16-18” tall with 5-7 buds per stem. PP#20549
Plant 12” apart.

Zones 3 - 9

---

**Lilium Lily Looks™ 'Tiny Rocket'**
Dwarf Asiatic Hardy Lily

Dark red flowers have darker red highlights. Grows 14-16” tall with 4-6 buds per stem. PP#24550
Plant 12” apart.

Zones 3 - 9

---

**Lilium Lily Looks™ 'Tiny Sensation'**
Dwarf Asiatic Hardy Lily

Deep yellow flowers have heavy maroon speckling. 5-7 buds per stem. Grows 14” tall. PP#716717
Plant 12” apart.

Zones 3 - 9

---

**Lilium (Oriental) 'Stargazer'**

Orange Hardy Lily

The brilliant crimson of this fragrant Oriental Hardy Lily is speckled and edged with pure white. Grows 30-36” tall and blooms in July. ‘Stargazer’ is outstanding in containers, borders, or as a cut flower in a vase. Plant 18” apart.

Zones 4 - 9

---

**Lilium (Oriental) 'Casa Blanca'**

Oriental Hardy Lily

This fragrant pure white Oriental Hardy Lily blooms in July to 48”, It is consid-iterated by many experts to be the finest of its kind. Oriental Hardy Lilies are taller than the Asiatic, most having a striking fragrance, and they bloom later in the season. Plant 18” apart.

Lilium (Oriental) ‘Sunny Bonaire’

Oriental Lily

As refreshing as a Caribbean breeze, fragrant upward-facing pale pink flowers with ruffled petals and orange anthers are delightful in summer. At just 16-20” tall this compact beauty is ideal for the front of the border. Plant 18” apart.

Zones 4-9

Lilium (Oriental) ‘Sunny Grenada’

Oriental Hardy Lily

Wonderful fragrance and large eye-catching flowers will draw more than just hummingbirds! Speciated burgundy-red blooms have a thin white margin on the slightly scalloped petals. The dark green foliage grows 16-18” tall and has 5-7 flowers per stem. Plant 18” apart.

Zones 4-9

Lysimachia nummularia ‘Aurea’

Golden Creeping Jenny

Sharon Bronson, key nursery staffer, likens gold-leaved ‘Aurea’ to “a shower of golden color.” Lobelia ‘Aurora’ may be lost in the bright foliage. Try it as an underpinning to Geranium ‘Rozanne’ or the rich dark blue of Veronica ‘Royal Candles’ spikes. Plant 18” apart.

Zones 3-8

Lithodora diffusa ‘Grace Ward’

Grace Ward Lithodora

There are few flowering plants that have such a contrast of bright blue flowers and deep green foliage reaching 4-8”. It has nice texture and spreading mat form. It flowers in the spring with some reblooming in the fall. Grows best in full sun and well-drained soil, trim back after blooming. Considered a tender perennial in our area, it is a drought tolerant plant worth having in any sunny garden spot. Plant 18” apart.

Zones 5-9

Lobelia cardinalis ‘Black Truffle’

Cardinal Flower

Emerging spring foliage is nearly black, transforming to deep maroon in summer and holding this color throughout the growing season. Brilliant red flowers bloom on 3-4” stems in August and September. Perfect water-side attraction for hummingbirds and butterflies. PPK25687

Plant 18” apart.

Zones 5-9

Gold = Sun, Green = Shade + level deer resistance
(see page 7 for program details)

Lysimachia nummularia ‘Maltese Cross’

Creeping White Mazus

Literally a carpet of bright green small leaves that spread rapidly in full sun to form a thick mat at about 1”. Moisture-tolerant, tough and hardy, this Mazus sports white flowers in May and June just above the foliage. It works well in the rock garden, as an underpinning to roses, or between stepping stones or pavers along a pathway. This is a strong grower and can’t be beat as a ground cover alternative. Plant 18” apart.

Zones 3-8

Lobelia cardinalis ‘Albus’

Creeping White Mazus

Literally a carpet of bright green small leaves that spread rapidly in full sun to form a thick mat at about 1”. Moisture-tolerant, tough and hardy, this Mazus sports white flowers in May and June just above the foliage. It works well in the rock garden, as an underpinning to roses, or between stepping stones or pavers along a pathway. This is a strong grower and can’t be beat as a ground cover alternative. Plant 18” apart.

Zones 3-8

Lysimachia nummularia ‘Goldmine’

Creeping Jenny

Goldmine Creeping Jenny produces stems that shoot out with each step when planted in and around a pathway. Use as a covering for small areas, in containers or in the vegetable bed to repel garden pests. Some shade and well-drained soil are essential. Plant 8” apart.

Zones 6-9

Mazus reptans ‘Albus’

Creeping White Mazus

Quick-to-spread by rooting stems, this versatile ground cover forms a carpet of light green leaves to a maximum height of 1”. Abundant bright blue flowers dot the foliage in May-June. Able to handle some foot traffic, it is the perfect choice between stones on a path. Also works well as a carpet under rose bushes or in the rock garden. A tough ground cover, it will perform best in moist soil. Plant 18” apart.

Zones 5-8

Meehania cordata ‘Alba’

Creeping Mint

A native of rich woodlands in the mountains of Pennsylvania south to North Carolina and west to Ohio and Tennessee, this lovely little mint spreads at by runners covering the woodland floor. 4-6” tall foliage is adorned with masses of 1” violet-blue flowers in May-June. Try interlaying between native Bleeding hearts and Christmas fern. Provide moist organic soil in dappled shade. Plant 12” apart.

Zones 5-8

Mentha requienii ‘Corsican Mint’

Corsican Mint

From the Mediterranean comes this micro-sized mint at 2” with tiny rounded leaves and lavender flowers in summer. A fresh and cleansing aroma is released with each step when planted in and around a pathway. Use as a covering for small areas, in containers or in the vegetable bed to repel garden pests. Some shade and well-drained soil are essential. Plant 8” apart.

Zones 6-9

Mertensia virginica ‘Virginia Blue Bells’

Virginia Blue Bells

The tubular flowers of our native Virginia Blue Bells are sapphire blue in color with hints of pink on 2” stems among rich green foliage. After blooming in April and May in the moist light shade it loves, the plant goes completely dormant, so plant them among Ferns and Hostas. Plant 18” apart.

Monarda bradburiana
Eastern Bee Balm
This central and southern U.S. native bee balm will be a welcome addition to the mid-Atlantic garden with its mildew-resistance and clumping (non-spreading) habit. Light pink-purple spotted blooms appear in late spring to summer drawing hummingbirds and butterflies to the tubular flowers. Fragrant, low-growing, loosely upright foliage is gray-green and grows 12-24" tall. Plant 18" apart.

 Zones 4 - 8

Monarda didyma 'Balmym™ Rose'
Dwarf Bee Balm
Used at the front of the border, this compact 10-12" tall bee balm will draw eyes to the long blooming vivid rose-pink flowers. Rabbitates and deer will leave it alone while bees and butterflies will be buzzing around the mildew-resistant foliage. Prefers moist, well-drained soil. PP26567
Plant 15" apart.

 Zones 3 - 7

Monarda didyma 'Balmy™ Purple'
Dwarf Bee Balm
Even though foliage is short at only 12" tall, the flary reddish-purple flowers have the same mesmerizing effect on bees and butterflies as taller varieties. Improved mildew resistance makes this a great choice for the front of the sunny border. PP925561
Plant 15" apart.

 Zones 3 - 7

Monarda fistulosa
Wild bergamot
North American native wild bergamot is a must for the meadow or naturalized area. In mid-summer the showy lavender-pink flowers will draw hummingbirds, bees and butterflies. 2-4" tall foliage has aromatic leaves that can be used in teas and are also deer resistant. Tolerates dryish soil but prefers moist well-drained soil. Plant 24" apart.

 Zones 3 - 7

Monarda x 'Raspberry Wine'
Bee Balm
Intoxicating ‘Raspberry Wine’ boasts ruby red blooms and raspberry-like buds bringing airborne visitors from afar. Blooming June-Aug. the aromatic foliage at 3-4" tall is tough and mildew resistant. Give lots of space in well-drained soil and full sun. The hummingbirds love this one! Plant 24" apart.

 Zones 3 - 7

Musa basjoo
Hardy Japanese Banana
Bring the tropics to your patio with this hardy banana known to survive -20° degree temperatures. Large paddle-shaped medium green leaves reach up to 15-20’ forming an umbrella-like canopy. Plants will need consistent moisture and some protection from strong winds. In zone 5 & 6, plants grown in the ground should be cut back after the first frost, wrapped in burlap, and provided heavy mulch. Plant 10-15’ apart.

 Zones 7 - 10

Nepeta racemosa
'Blue Wonder'
Catmint
It is no wonder this compact Catmint is a popular choice for the front of the border or the rock garden. Long-lasting lavender-blue flower spikes begin their show in early summer on 12-18" tall gray-green foliage. Re-blooming occurs into fall with occasional trims. Plant 12” apart.

 Zones 5 - 9

Nepeta x faassenii
'walker’s Low'
Catmint
A native garden classic with a strong minty foliage fragrance, this June-August bloomer has big red, globe-shaped flower heads of tubular petals that are irresistible to bees, butterflies, and hummingbirds. ‘Jacob Cline’ is the most mildew resistant Red Bee Balm known. It grows to a height of 6" and looks best in large groups in the border. Plant 24” apart.

 Zones 4 - 8

Muehlenbeckia axillaris
Creeping Wirevine
Trailing dark waxy stems with small rounded green leaves will spill out of hanging baskets or creep through planting beds. Foliage reaches 2-4” and produces tiny white fruit with black seeds. Combine in a container with colorful Heuchera and Carex, or allow to cascade over stone walls. Can be planted in full sun or partial shade and is drought tolerant once established. Plant 12” apart.

 Zones 3 - 7

Nepeta x faassenii ‘Walker’s Low’
Catmint
Perennial Plant of the Year 2007
A sun lover if there ever was one, its airy masses of small flowers are deep lavender starting in June and through most of the summer. 24-30” tall foliage has fragrant gray-green leaves. Shearing back after first flowering will encourage repeat blooms. Nepeta does best at the edge of the border in dryish, ordinary soil where its bushy foliage will complement other full sun perennials such Hemerocallis ‘Stella de Oro’, Achillea ‘Coronation Gold’, and many others. Massed along a pathway, its delightful fragrance is released when brushed. Plant 18” apart.

 Zones 3 - 7

Nepeta x faassenii Junior Walker™
Catmint
Performing all the same duties as ‘Walker’s Low’, versatile, long blooming, drought tolerant, non-reseeding, at just over half the size. The aromatic foliage is topped with 18” lavender-blue spikes from mid-May through September. An occasional trim allows the production of fresh flower spikes. PP33076
Plant 18” apart.

 Zones 5 - 9

Nepeta racemosa
‘Little Titch’
Catmint
A cute little Nepeta, so well behaved and compact. The moundling gray-green foliage grows to 8-10” tall and wide with petite lavender-blue flowers close to the foliage in May through September. Use as an edging plant or in the rock garden. With an occasional trim ‘Little Titch’ just keeps blooming all summer to fall. Plant 12” apart.

 Zones 5 - 9

Nepeta x faassenii
