Abelia x 'Edward Goucher'
Abelia
This long blooming shrub has arching branches that hold clusters of lavender-pink tubular flowers from mid-summer to fall. Foliage grows 3-5’ tall and turns bronze-purple in fall. Use as a hedge or specimen in the mixed border.
Plant 3-5’ apart.

Abelia x ‘Rose Creek’
Abelia
Pink tinged in spring, the low mounding 3’ tall foliage becomes glossy dark green in summer. Clusters of fragrant tubular white flowers and rose-pink sepals appear on the ends of burgundy stems in late spring to fall. In warmer climates where Abelia remains evergreen the foliage develops a purple hue in winter.
Plant 48” apart.

Arctostaphylos
uva-ursi
Bearberry, kinnikinnick
Native evergreen bearberry is a shrubby ground cover for cool climates and poor sandy soils. The 6-12” tall foliage has dark green small rounded leaves and nodding white flowers in mid to late spring. Flowers are followed by bright red berries, (beloved by bears), that persist into winter. The foliage becomes a reddish-plum color in fall.
Plant 18” apart.

Berberis thunbergii
‘Crimson Pygmy’
Dwarf Japanese Barberry
Reddish-purple foliage on this classic dwarf Barberry with small leaves on arching spiny stems at 2-3’. Here’s a shrub that handles most any kind of soil as long as it’s not waterlogged. Its dense habit and ability to blend well with a host of perennials and other shrubs make this plant a natural choice for design.
Plant 3’ apart.

The Perennial Farm is "The Delivery Specialist" with deliveries to most locations 2-3 times per week

**Buddleia x ‘Miss Ruby’**

**Butterfly Bush**

‘Miss Ruby’ blooms a vibrant fuchsia pink and is well behaved in the sunny border because it does not send out suckers and produces very little seed. Blooms begin in early summer and continue into fall on the 3-5’ tall bushy foliage. Prune in late winter or early spring. Plant 36” apart.

**Zones 5 - 9**

**F**

**New for 2019**

**Buddleia davidii Monarch**

**Prince Charming**

**Butterfly Bush**

No damsels in distress will distract this Butterfly Bush from blooming profusely! 10’ long clusters of sapphire-blue flowers appear from mid to late summer on upright 3-4’ tall foliage. Surround with Carexpsapis to create an irresistible attraction for butterflies. PP12803 Plant 4’ apart.

**Zones 5 - 9**

F

**Buzz™ 'Ivory’**

Creamy White blooms. 3-5’ tall.

**Buzz™ 'Lavender’**

Dark purple flowers. 2-3’ tall. PPAF

**Buzz™ 'Midnight’**

Dark purple flowers. 2-3’ tall. PPAF

**Buzz™ 'Sky Blue’**

Pink flowers. 3-4’ tall. PP23462

**Buxus x sempervirens**

**‘Green Velvet’**

**Boxwood**

Compact dense foliage has a broad mounded form with a moderate growth rate in an overall height and spread of 2-4’. In Zones 5 & 6 plant in a sheltered location to protect from winter winds. Plant 3’ apart.

**Zones 5 - 9**

F

**New for 2019**

**Buxus x ‘Winter Gem’**

**Boxwood**

Korean littleleaf boxwood is compact and mounded with an open habit. Grows 5’ tall over several years if not pruned. Plant 3’ apart.

**Zones 5 - 8**

F

**Caryopteris clandonensis**

**‘Inoviers’ Grand Bleu**

**Bluebeard**

Blooming in mid to late summer with deep violet blue flowers against silvery green foliage, the effect is said to resemble a blue mist. The aromatic leaves add appeal to this compact shrub. Treat as a perennial and cut to just above ground in late winter. Grows 24-30” in height. PP17837 Plant 24” apart.

**Zones 5 - 9**

F

**Cephalotaxus harringtonia var. drupacea**

**Japanese Plum Yew**

Evergreen Taxus-like foliage is dense and branches are slightly drooping. It grows slowly 9’ tall and 10’ wide and is deer resistant. Plant 5’ apart.

**Zones 6 - 9**

**F**

**Clethra alnifolia**

**‘Hummingbird’**

**Summersweet**

Native summersweet thrives in the partly shady, moist shrub border or woodland’s edge, and the very fragrant white bottlebrush like flowers in July and August are much valued by birds, butterflies and bees. ‘Hummingbird’ is a compact variety that grows 3-4’ tall and is slower to spread than the species. Brilliant yellow foliage in fall. Plant 36” apart.

**Zones 3 - 9**

F N Cultivar

**Comptonia peregrina**

**Sweet Fern**

A deciduous shrub, ‘sweet fern’ refers to the sweet odor of the leaves, especially when crushed, and the silvery-green fern-like foliage. 2-4’ tall foliage grows in dry, sandy sites and is native to eastern North America. Comptonia will tolerate salt spray and is a common companion in pine tree stands, spreading to form colonies. Plant 48” apart.

**Zones 2 - 7**

F N

**Deutzia gracilis**

**‘Nikko’**

**Slender Deutzia**

Deutzia offers many seasons of interest from the very floriferous spring blooming season to the attractive dense mounding green foliage in summer that transforms to gorgeous burgundy red in fall. Clusters of small white flowers appear on upright panicles in late spring. 1-3’ tall foliage spreads up to 5’ wide. Plant 48” apart.

**Zones 3 - 9**

F

**Caryopteris x 'First Choice’**

**Blue Beard**

This compact form of Caryopteris has deep inky-blue buds that open to large cobalt-blue flowers, which are profuse on erect stems from late August to early October. Best of all, the rounded compact habit means ‘First Choice’ requires little pruning and won’t have the floppy habit some cultivars exhibit. Plant 3’ apart. Grows 36” tall. PPA11958 Plant 24” apart.

**Zones 5 - 9**

F

**Cephalotaxus harringtonia**

### Fothergilla major

**'Mt. Airy'**

Dwarf Fothergilla

**Shade**

Fragrant flowering shrub known for fall color and fragrant flowers. It has been chosen to grow in the U.S. because of its vigorous growth habit (to 5'), lovely autumn color, dependable cold hardness, and the bonus of those white flowers that open as leaves emerge in spring. Fall color is bright where this shrub is grown in full sun. Give it the moist, peaty, acid soil it prefers.

### Gaultheriaprocumbens

**Cherry Berries™ Wintergreen**

In spring masses of white nodding bell-shaped flowers cover the low growing 6-8" tall dark green foliage. But wait there is more. Following the flowers are masses of bright red edible berries that form in summer and persist into fall and winter. Wintergreen is native to eastern North American oak woods and bog and produces a wintergreen mint aroma when the leaves are crushed.

Plant 24" apart.

Hydrangea quercifolia
Ruby Slippers'
Oakleaf Hydrangea
Gorgeous rose-pink infusion of white at first but soon turn pale pink and then deep rose red. Long flowering panicles are held above the dark green foliage in summer. This compact hybrid grows to 3.5' tall and 5' wide. Deeply lobed leaves turn mahogany-red in fall and exfoliating bark provides winter interest. A 2015 U.S. National Arboretum introduction. Plant 60" apart.

Ilex glabra ‘Shamrock’
Inkberry
A compact broadleaf evergreen shrub that is a great choice for mass plantings, foundations and naturalizing. Shamrock Inkberry is very disease resistant, and is a great choice for rain gardens. Plants will produce small, black berries if male is present. 3'-4' tall by 3'-4'. Plant 4" apart.

Ilex verticillata
‘Winter Red’
Winterberry
Winterberry is a favorite for its bright red berries on bare stems in winter and attractiveness to birds and beneficial insects. Grows 8'-10' tall with dark green deciduous foliage and small white flowers in late spring. Male plant such as ‘Southern Gentleman’ must be present for berries to be produced. Plant 6’ apart.

Itea virginica ‘Henry’s Garnet’
Virginia Sweetspire
‘Henry’s Garnet’ has fragrant 6" long white racemes in June and July in good quantities. The rich green leaves make a nice rounded shape 4-5' high and 6' wide. Its foliage in the fall is dependably brilliant reddish-purple in color before fulfilling its deciduous life cycle. This shrub is easy to grow, handling shade or sun, and wet or dry soils. Plant 5’ apart.

Itea virginica ‘Little Henry’
Dwarf Virginia Sweetspire
The arching shoots of native ‘Little Henry’ bear the same fragrant white bottlebrush blooms as ‘Henry’s Garnet’, but this handy little deciduous shrub reaches 2 1/2’ tall at best. Tidy in shape, the shiny dark green leaves turn brilliantly red-purple in fall. As a foil for competing perennials colors in the border, for foliage contrast, or massed on its own, ‘Little Henry’ is an alternative worth considering. PPR10585 Plant 3’ apart.

Juniperus horizontalis
Plumosa Compacta
Youngstown
Andorra Juniper
Grey-green foliage turns plum red for the autumn and winter months providing hue, the evergreen seasons of interest. Drought and salt tolerant, and able to grow in almost any soil type, this native groundcover is good in group plantings both large and small. Minimal maintenance plant. Grows 12-18’ tall by 5-10’ wide. Plant 5’ apart.

Drought and salt tolerant, and able to grow in almost any soil type, this native groundcover is good in group plantings both large and small. Minimal maintenance plant. Grows 12-18’ tall by 5-10’ wide. Plant 5’ apart.

Leucothoe axillaris
Coastal doghobble
Native to most evergreen shrubs is well suited to moist, shaded areas with protection from winter winds. Grows 2-4’ tall with dark mahogany green leaves. Fragrant white bell-shaped flowers appear in spring and attract bees and butterflies. Plant 36” apart.

Leucothoe axillaris
Coastal doghobble
Native to most evergreen shrubs is well suited to moist, shaded areas with protection from winter winds. Grows 2-4’ tall with dark mahogany green leaves. Fragrant white bell-shaped flowers appear in spring and attract bees and butterflies. Plant 36” apart.

Ligustrum japonicum
Japonica
Japonica Japanese Privet
This upright shrub has long lasting blooms which appear in late winter to early spring and last for many weeks. Reddish-purple buds and creamy white urn-shaped flowers appear on dangling chains. Glossy evergreen foliage grows to 8’ tall. Plant 5’ apart.

Ligustrum japonicum
Japonica
Japonica Japanese Privet
This upright shrub has long lasting blooms which appear in late winter to early spring and last for many weeks. Reddish-purple buds and creamy white urn-shaped flowers appear on dangling chains. Glossy evergreen foliage grows to 8’ tall. Plant 5’ apart.

Myrica pensylvanica
Bayberry
Native to eastern coastal areas of the United States and Canada, bayberry’s tolerance of drought, poor soils, high winds and salt make it ideal for the coastal landscape. Dark green leathery foliage is deciduous. Aromatic gray berries are commonly used to make candles and soaps. Grows 6-10’ tall. Plant 6’ apart.

Myrica pensylvanica

Dark green leathery foliage is deciduous. Aromatic gray berries are commonly used to make candles and soaps. Grows 6-10’ tall. Plant 6’ apart.
Rubus Raspberry Shortcake™
Bushel and Berry®
No longer does one need to pick raspberries from an out of control thorny bush. Rubus Raspberry Shortcake™ is so compact at 2’-3’ and painless, aka thornless, that it can be placed in a patio container or tight garden space near a walkway. Fragrant white blossoms are followed by delicious berries in mid-summer on compact plants that do not require staking. Self-pollinating. PP#21541
Plant 3’ apart.

Syringa Bloomerang® Purple
Dwarf Lilac
No one ever gets enough of the sweet fragrance of spring blooming Lilac. This exciting re-bloomer gives us the usual round of clusters of lavender-purple flowers in spring, takes a break in the heat of summer, and then continues to blooms with much more fervor in late frost! Prompty remove spent flowers. A deciduous shrub, it grows 5’ tall and wide. PP#29575
Plant 5’ apart.

Zones 4 – 7

Vaccinium x Blueberry Glaze™
Bushel and Berry® Blueberry
Yum Yum Yum! Plant this blueberry in a patio container or place in the shrub border where there is easy access to the delicious white-blue flowers. Whitish-pink flat-topped clusters of white flowers in spring. Native lowbush blueberries are self-pollinating. PP#22662
Plant 24” apart.

Zones 4 – 8

Vaccinium x Jelly Bean™
Bushel and Berry® Blueberry
Super sweet berries in large numbers are nestled amongst dense foliage in mid-summer and may well spark a dual between Mother Nature’s four legged friends and the human harvest. Vaccinium x Jelly Bean™ is a container shrub when the multitudes of blueberries are set against re-streaked dark green leaves. Petite white blooms in spring precede berries. 12-24” tall. Self-pollinating. PP#22662
Plant 24” apart.

Zones 4 – 8

Vaccinium x Pink Icing™
Bushel and Berry® Blueberry
Whether you like blueberries or not, use Pink Icing™ as an ornamental for its stunning spring and winter foliage. New growth emerges in pink hues and combines with blue and dark green in mild climates. White flowers in spring followed by robust blue berries in mid-summer are an added bonus. 3-4’ tall mounding foliage. Self-pollinating. PP#23232
Plant 24” apart.

Weigela florida
Wine & Roses®
Weigela
Weigelas are primarily grown for their trumpet-shaped flowers that appear in May and June, and then sporadically throughout the summer. Wine & Roses® has deep rose-pink 1-2” long funnel flowers that offer brilliant contrast to the 4-5” tall dark burgundy wine-colored foliage. PP190772
Plant 3’ apart.

Yucca filamentosa
‘Bright Edge’
Variegated Adam’s Needle
Thriving in infertile, dry, sandy soil, as well as being reliably hardy, Yuccas continue to gain popularity throughout our area. The sword-like leaves are rich green with a decided bright yellow leaf edge. The height is 36” and the same lovely white flower bells rise on strong stalks in July and August. Plant 2’ apart.

Yucca filamentosa
‘Color Guard’
Variegated Adam’s Needle
‘Color Guard’ has stiff green sword-shaped leaves with white edges. Creamy-white flowers bloom on 3-4’ tall stalks in early summer. Very drought tolerant. Plant 48” apart.

Campsis radicans
‘Flamenco’
Trumpet Vine
This vigorous native vine grows to 30-40’ over several years and is best planted near a wall, trellis, fence or arbor. Bright orange-red tubular flowers have orange throats and appear in terminal clusters. A favorite among hummingbirds, blooms begin to appear in mid-summer and continue through late summer. Very adaptable to a variety of soil types. Plant 8’ apart.

Campsis radicans ‘Flava’
Yellow Trumpet Vine
While definitely yellow in color, hummingbirds find the clusters of long-blooming, yellow trumpets irresistible as nectar flowers. The rich, green foliage turns golden-yellow in autumn when blooms finally slow down. Ordinary soil is much preferred to provide summer-long blooms. An application of bonemeal to the soil in the spring will encourage blooms. Grows 25-35’. Plant 5’ apart.

Campsis radicans ‘Indian Summer’
Trumpet Vine
‘Indian Summer’ is a bit more compact than the species growing to 12-15’ on sturdy vertical structures. Yellow-orange trumpet flowers have a red throat and grow in clusters from late spring to early summer. Provides quick cover but can be quite vigorous, although thought to be less aggressive than the species. Plant 5’ apart.

Campsis x tagliabuana ‘Madame Galen’
Trumpet Vine
This reddish-orange to salmon-red form of the classic hummingbird magnet that blooms all summer is a cross between Campsis radicans (American trumpet vine) and Campsis grandiflora (Chinese trumpet vine). The woody, clinging foliage attaches to upright structures and grows up to 25-35’ high. Plant 6’ apart.
