Zones 9 - 11 ☀️☀️

Aeonium haworthii
Pinwheel
Aeonium is a succulent evergreen subshrub originating in the Canary Islands, grown in the garden in temperate regions but as a house plant or in containers in much of the United States. Similar to Sempervivum, small rosettes of thick fleshy leaves are formed around a larger central rosette. Spoon-shaped bluish green leaves have reddish margins and pale yellow flowers on 2' stalks arise from the central rosettes in late spring. Grows 18-24" tall. Prefers dryish soil and dislikes humid, soggy conditions. **Plant 12" apart.**

Zones 9 - 11 ☀️☀️

Aeonium haworthii 'Kiwi'
Kiwi Pinwheel
Delightful succulent rosettes that measure 5" across have yellow center leaves that are surrounded by fruity green leaves with reddish-pink margins. Yellow flowers bloom in summer. In regions where it is winter hardy, it will grow up to 2-3' tall and wide. **Plant 12" apart.**

Echeveria
Native to higher elevations of Mexico and Central America, there are over 150 species of Echeveria with many introduced to the gardening world. These succulents are valued by gardeners and collectors for their variety and intensity of foliage colors. Hardy to only zone 9 and, as xeric plants they require very little moisture, so it is best to grow under cover in full sun or light shade in the North East and Mid-Atlantic. Fleshy rosettes, mostly stemless, spread by offsets much like Hens and Chicks (Sempervivum). Plant in well-drained soil with plenty of organic matter.

Zones 9 - 11 ☀️☀️

Echeveria 'Black Prince'
Echeveria
'Black Prince' forms dark purplish-black rosettes that are 4-12" tall. Each leaf within the ground-hugging rosette is spade-shaped. Dark red flowers on short stems appear in early to late fall. **Plant 12" apart.**

Zones 9 - 11 ☀️☀️

Echeveria deranosa
Echeveria
Bluish-green rosettes are only 3-4" tall and fill out to about 8" wide. Leaves have pinkish-maroon margins. Yellowish-orange flowers bloom in spring. **Plant 8" apart.**

Zones 9 - 11 ☀️☀️

Echeveria elegans
Mexican Snowball
Fast spreading tight rosettes have cool blue-grey tones with bright pink blooms in spring to early summer. Grows 8" tall. **Plant 12" apart.**

Zones 9 - 11 ☀️☀️

Echeveria elegans
'Gray Red'
Mexican Snowball
A moderate spreader that has elongated blue-grey leaves with hints of red. Grows 4" tall. **Plant 6" apart.**

Zones 9 - 11 ☀️☀️

Echeveria haagii
tolimanensis
This Echeveria is shrub like with thick leaves forming on stems rather than in rosettes. Foliage is blue-grey with occasional pink overtones and grows to 12". **Plant 12" apart.**

Zones 9 - 11 ☀️☀️

Echeveria nodulosa
Amazing foliage resembles hand-painted pottery! Olive-green leaves have fine red margins and red painted patterns in the center of the spoon-shaped leaves. Grows to 8-12" tall. **Plant 12" apart.**

Zones 9 - 11 ☀️☀️

Echeveria 'Perle von Nurnberg'
Rounded outer leaves of the rosettes are purplish-blue and the center leaves are rose-pink. Coral-pink flowers bloom in mid-spring. 6-10" tall. **Plant 8" apart.**

Zones 9 - 11 ☀️☀️

Echeveria pulidonis
Echeveria
Blue-green spade shaped leaves have deep red tips. Bright yellow flowers in spring hang on un-branched red stems. Offsets will slowly form over time. Grows 12" tall. **Plant 12" apart.**

Zones 9 - 11 ☀️☀️

Echeveria runyonii
'Topsy Turvy'
Mexican Hens and Chicks
Curvy and slightly twisted leaves of silvery-blue. Yellow and orange flowers in late summer. Grows 6" tall. **Plant 12" apart.**

Zones 9 - 11 ☀️☀️

Graptopetalum paraguayense
Mexican Ghost Plant
3-6" wide succulent rosettes form on cascading stems in a range of colors from pink to blue to purple. Small white flowers bloom in spring. This variety is a bit hardier and is great for hanging baskets, dish gardens, or vertical gardens. **Plant 12" apart.**

Zones 9 - 11 ☀️☀️

Kalanchoe thyrsiflora
Flapjack / Paddle Plant
This native of the South African desert offers unusual lines and structure for containers with fleshy paddle-shaped upright leaves that are sage green and become red-tinged in full sun. Leaves are 6" in diameter and form a rosette that will typically grow 10-14" tall in a growing season. Occasional yellow flowers bloom from mature rosettes. Drought tolerant once established. **Plant 12" apart.**

Zones 10 - 11 ☀️☀️

Senecio mandraliscae
Blue Finger
Upright finger-like bluish-gray leaves are slightly curved. Native to South Africa, this succulent requires little water and forms a dense mounding mat of foliage to 12-18" tall. Whitish flowers appear in mid-summer. Use in containers in the Mid-Atlantic and North East U.S. **Plant 18" apart.**

Zones 10 - 11 ☀️☀️

Senecio serpens
Blue Chalksticks
Succulent powdery-blue 1-2" long finger-like leaves grow along prostrate stems to 12". A bit smaller and less vigorous than S. mandraliscae. Small white flowers appear in mid-summer. **Plant 12" apart.**

Alocasia 'Mayan Mask'
Masquerade™ Series
Elephant Ear
 A must artifact for the collector of all things tropical or for the eclectic garden. Sturdy 8' upright leaves are puckered and glossy green on the topsides with light green veins and bronzy-maroon undersides. Commands attention as a focus point in the garden or container. Prefers moist soil, but not too wet, and protection from afternoon sun. Use in mixed borders with colorful Canna, large containers by the pool, patio or water feature. Dig up after first frost and store in a cool dry place for the winter. PP#24391
Plant 5' apart.

Zones 9 - 11

Alocasia 'Regal Shields'
Elephant Ear
 1-3' long deep dark green leaves fan out from rosettes and are contrasted by a burgundy reverse on the shield-like leaves. Grows 3' tall.
Plant 24" apart.

Zones 9 - 11

Canna Cannova® Series Canna Lily
 The earliest flowering Cannas on the market in several brilliant colors: 'Bronze Scarlet' with deep red flowers and bronze foliage; 'Mango', 'Orange', 'Red Shades', 'Rose' & 'Yellow' with deep green foliage. Cannova® Cannas perform better in cooler climates than predecessors and have a robust growth habit with excellent branching and healthy foliage. Grow 30-48" tall. **Plant 24" apart.**

Musa basjoo
Hardy Japanese Banana
 Bring the tropics to your patio with this hardy banana know to survive -20 degree temperatures. Large paddle-shape medium green leaves reach up to 15-20' forming an umbrella-like canopy. Plants will need consistent moisture and some protection from strong winds. In zone 5 & 6, plants grown in the ground should be cut back after the first frost, wrapped in burlap, and provided heavy mulch.
Plant 10-15' apart.

Zone 5 - 10

Musa sumatrana 'Zebrina'
Ornamental Banana
 Use 'Zebrina' in large containers to add a tropical flare to the patio, deck or pool-side garden. 5-8' tall foliage has large fans of red and green mottled leaves that are maroon on the undersides. Wind and cold resistant. Prefers consistently moist, well-drained soil.
Plant 6' apart.

Zone 9 - 11

New for 2019

Colocasia esculenta 'Black Coral'
Elephant Ear
 Aloha Black Coral! From the sturdy, disease resistant Royal Hawaiian® series, this exotic has glossy black foliage, electric blue veins and heavily corrugated leaves. Grows in a clump to 3.5' tall. Prefers moist rich soil. Plant with Canna 'Pretoria' for a knockout tropical combination. PP#23896
Plant 3' apart.

Zones 8 -11

Colocasia esculenta 'Mojito'
Elephant Ear
 Imagine splattering purple to near-black paint onto a canvas of lime green after consuming one too many of the above named minty beverages...the foliage of this tropical elephant ear could easily be featured in an abstract art show. Leaves can grow up to 2' long by 18" wide with an overall height of 3-4'. Performs best in partial shade and consistent moisture. It's a jungle out there! PP#21995
Plant 36" apart.

Zones 8 -11

Ensete maurelii
Red Abyssinian Banana
 Kick your feet up and relax next to this huge 8-10' tropical ornamental banana. Perfect for a large container, the showy long and thick dark green leaves are tinted burgundy red with red leaf axils. Enjoy pool-side or pond-side and keep an eye out for Tarzan.
Plant 5' apart
